"Comments on Notice of Inquiry, ET Docket No. 138[redacted]"

I am electrically hypersensitive. Prior to approximately 6 years ago, I was able to live a fairly normal life. With the advent of increased wireless technology, my existence became very restricted.

I had to leave Manhattan, where I lived for 35 years, and move to the country. I could no longer travel because all motels and hotels now have wireless. Going to the library is problematic. My mother was recently hospitalized, and the daily visiting took its toll on my health because of all the wireless. I would like to go to Manhattan to see old friends, and consult a doctor, but I cannot.

Most telling was my recent visit to Dr. Thomas Moorcroft in Orlan, Conn. I made an appointment with him, not knowing that his office was on the

same block as a cell phone tower. I had trouble performing certain neurological tasks that I could always execute, such as balancing on one foot with closed eyes. I feel weak, had trouble thinking, and was very irritable because of the [redacted] phone tower.

I am not alone. I ask you to please lower the exposure standards for radio frequency radiation

Yours truly,
Esta Schultz
