

Why is there a Patent for Subliminal Acoustic Manipulation of the Nervous System? Patent # 6017302A

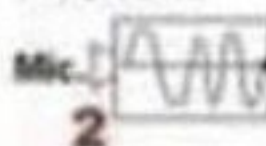

In human subjects, sensory responses can be evoked by subliminal atmospheric acoustic pulses that are tuned to the resonant frequency. The 1/2 Hz sensory response affects the autonomic nervous system and may cause relaxation, drowsiness, or sexual excitement, depending on the positive acoustic frequency near 1/2 Hz used. The effects of the 2-5 Hz response include slowing of various control processes, sleepiness, and drowsiness. For these effects to occur, the acoustic stimulus must be in a certain deeply subliminal range.

Silent Sound Subliminal Mind Control

1 Steady tone, near the high end of the hearing range, say, 15,000 Hz

2 Hypnotist's Voice, varying from, say, 300 Hz to 4,000 Hz

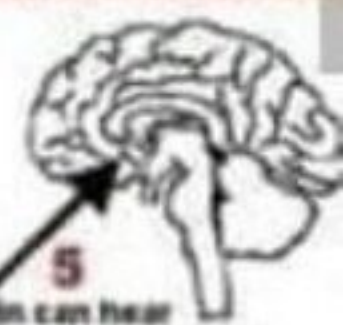

FREQUENCY MODULATOR, VOICE CONTROLS FREQ.

4 Output is now more or less a steady tone, sounding like tinnitus, but with hypnosis embedded

5 Brain can hear voice & understand

5 Ear only hears a "tone" or "buzzing/tinging"
