Dr Bernard Eastlund physicist designed and patented early HAARP technology visionary approach to defense against missile attacks. But like all created US government technologies, HAARP (reported by Edward Snowden in 2013 as HAARP Assassination) is another Weapon of Mass Destruction used against the human race and animal population!

As reported by Dr. Bernard Eastlund the leading contributor of High Frequency Active Auroral Research Program known as HAARP, in a 2008 paper he describes the use of microwave radiation for weather modification activities. These include experiments on tornados using satellites as well as ground based facilities such as Doppler radar, known also as NEXt-generation RADar (NEXRAD). **Atmospheric Heating as a Research Tool**

28 December 2025 | ZEROGeoengineering.com | Dr. Bernard Eastlund is recognized as a leading contributor to the High Frequency Active Auroral Research Program also known as HAARP. His 2008 paper below describes the use of microwave radiation for weather modification activities. These include experiments on tornados using satellites as well as ground based facilities such as Doppler radar, known also as NEXt-generation RADar (NEXRAD).

Inaccurately characterized in the report as a form of clean energy, **microwave radiation** is in fact, pollution that can also be used as a weapon. To what extent NEXRAD facilities and satellites may be modifying weather, altering weather patterns, or impacting health and environmental conditions is a relevant factor in discussion on weather extremes.

"This paper describes concepts that use either ground or space based platforms for generating beams of microwave radiation to provide localized thermal heating or ionization of the atmosphere. It is further suggested that these heating techniques could initially be used as research tools for improving computer simulations of atmospheric phenomena."

B. J. Eastlund and L. M. Jenkins, "Atmospheric Heating as a Research Tool: Link to Space-Based Solar Power," 2008 IEEE Aerospace Conference, Big Sky, MT, USA, 2008, pp. 1-8, doi: 10.1109/AERO.2008.4526526.

US Airforce has been conducting studies of effects of Electromagnetic Weapons on people for decades. According to UK Physicist Barrie Trower acting as a UK Agent questioning secret agents "United States used its own people as guinea pigs!" Also reported by Barrie Trower, environmentalist and epidemiologist Dr John Goldsmith discovered low level microwaves caused cancers, particularly breast cancer and childhood leukemias. From a study reported on September 2, 2002, by a group of scientists led by scientist Dr. Neil Cherry, EMF/EMR reduces melatonin in animals. According to the findings of this study, the pineal gland cannot tell the difference between light and EMF/EMR so melatonin is not being made causing an increase in cancer particularly breast cancer in women.

Proof Directed Energy Weapons being tested in 1970's:

A failed Military experiment over Bell Island, Newfoundland in April 1978 was reported in a documentary by Barbara Doran and John Whallen entitled "The Invisible Machine Electromagnetic Warfare."

Bell Island, Newfoundland on the edge of the Atlantic experienced a blast from a first known Directed Energy attack in April 1978. Barbara McCain witnessed the blast from 20 miles away. The US and Russia were testing and protecting their arsenal of well-developed electromagnetic Directed Energy Weaponry, in the works for 30 years since 1948.
