A Report on Non-Ionizing Radiation

Sir William Stewart: Evidence of a Cell Phone Risk Stronger Today than in 2000

November 20, 2006

According to today's London *Times*, Sir William Stewart believes that the evidence that microwave radiation can have potentially harmful effects has become more persuasive over the past five years. Stewart, who was the the chief science advisor to the U.K government from 1990 to 1995, is the head of the U.K.'s Health Protection Agency —which absorbed the NRPB last year. He chaired the panel which wrote the influential report *Mobile Phones and Health* in 2000.

Sir William Stewart, HPA, U.K., NRPB, cell phones,
