

COLLOQUIUM

BIOMEDICAL APPLICATIONS OF ELECTROMAGNETIC FIELDS

PROF. ARTHUR A. PILLA

Director, Bioelectrochemistry Laboratory
Department of Orthopedic Surgery
Mount Sinai School of Medicine

CELLULAR MECHANISMS INVOLVED IN BIOMEDICAL
APPLICATIONS OF PULSED ELECTROMAGNETIC FIELDS

Date: Wednesday - December 8, 1982

Time: 10:15 a.m.

Place: National Institutes of Health
Clinical Center, Building 10
Amphitheatre, Room 1C114 (Enter from 1N118)
9000 Rockville Pike
Bethesda, MD 20205

Parking: Available in Visitor Parking Lots 20C and 1B
for maximum of three hours without permit.
Information for extended parking privileges
can be obtained by calling the number below
prior to 1 December.

The primary objective of the colloquium series is to bring together a number of distinguished scientists from various disciplines in the area of biomedical applications of electromagnetic fields in an atmosphere conducive to intellectual stimulation and information transfer. This is the first of a number of colloquia to be held in the Washington, D.C. area during 1982-1983. The colloquium is being supported by a contract from the Office of Naval Research. The colloquium facility is being furnished by NIH-NIADDK.

For information, contact the host organization:
