

EVERY DAY WE ARE REMINDED OF THE BIG RISKS WE TAKE BY NOT FOLLOWING PRODUCT LAWS.

It's not good enough!

Do you remember when you were a child with own dreams?
When everyone spoke the truth as a lesson.

... IS A CODE, A CODE OF HONOR.

When silence and trust become just a game

believes every child should
effective treatment(s), yet many
find nor afford treatments that
the best chance at successful
outcomes.

When you were taught to play in the dirt,
the mud, dig in the soil to understand how
to plant a potato that will grow. Do it yourself.

BSABA International

What is happening to our children?

We have many clues that environmental toxins could be the culprit. From heavy metals, to plastics, to chemicals and pesticides, to wireless radiation, to pharmaceuticals—our children are being exposed to more toxins than ever. It's time to find answers and stop the epidemic of chronic disease in our children. We desperately need more research to understand the root causes of this drastic rise in neurodevelopmental disorders and chronic disease in our children. REACT, Inc. believes every child should have access to effective treatment(s), yet many families cannot find nor afford treatments that give their child the best chance at successful outcomes. There is hope for a better future!
