

 does 600 me...

- **Excessive exposure:** Like all radiofrequency (RF) energy, extreme concentrations can heat body tissue, but everyday consumer devices operate well below these thresholds.  IEEE Spectrum +3

2. Cancer and Tumors

- **The Classification:** The International Agency for Research on Cancer (IARC) classifies RF electromagnetic fields as a "Group 2B" carcinogen. This means it is "possibly carcinogenic to humans," a category indicating that a causal link cannot be
