

Date: 10/14/2026

To: The Honorable Robert F. Kennedy Jr.

Regarding: Urgent Request to Investigate Unacknowledged Programs and Intelligence Abuse

Dear Mr. Kennedy,

I am writing to *you* as a citizen deeply concerned with government accountability, health freedom, and the weaponization of federal agencies against regular Americans. I am a law-abiding citizen who still has my RN license. I have been black balled and put on this TSDB list. Dr. Lydia Shajenko diagnosed me with Havana Syndrome that is caused from Direct Energy Weapons.

As an advocate for transparency, you are aware of the historical overreach of the intelligence community. Today, thousands of citizens-identifying as Targeted Individuals-are reporting ongoing, unacknowledged programs reminiscent of MK-Ultra, including illegal surveillance, financial blacklisting via the Terrorist Screening Database (TSDB), and the deployment of non-lethal directed energy technologies on domestic soil.

Legal advocates like attorney Ana Toledo have brought forth extensive evidence and civilian affidavits detailing these severe civil liberties violations, yet mainstream oversight channels have continuously delayed acting.

Given your commitment to restoring constitutional rights and cleaning out institutional corruption, I urgently request that you use your platform and official capacity to:

1. **Demand** transparency regarding the extrajudicial listing of American citizens on federal monitoring databases without due process.
2. **Initiate** formal investigations into modern weaponization tactics and health incidents affecting civilians domestically.

The power to protect the public lies in numbers and transparent leadership. I look forward to your proactive stance on ending these illicit programs and protecting innocent victims.

Sincerely,

Kim Peterson
