Feb. 5, 2013

Those Concerned,

I request that the amount of acceptable radiation the public be exposed to is lowered per the "recent" Environmental re-evaluation.

Since SmartMeters went into our neighborhood the effects have been overwhelming. We have constant ringing in our house that affects sleep, concentration and thus health. I have documented this in detail in letters sent to the CPUC and my city.

As the meters have increased across the country travelling has become equally unpleasant and unhealthful. Children and the elderly and the infirm are, of course, the most vulnerable (along with pregnant women). We have seen the fast increase of dementia and Alzheimer's in the elderly and ADDH, autism, and Asperger's in the young as well as sleep disorders among the middle aged as well as depression. Many feel that the increase in the electromagnetic fields is responsible for this.

Thereby I strongly suggest we follow Europe's model, particularly Sweden, Switzerland and all others who have much lower allowable RF and radiation allowed, especially near schools and homes.

Most Sincerely,
Rhonda Hoefs

Brief Comment

Since I already am suffering from the effects of SmartMeters and constant bombardment of wi-fi my work choices and health are so compromised that I will be forced to be supported by the public, which I suspect more and more people will be. There are safe ways to connect people with the internet as Europe is finding out. Please also see the study released in May by the Natl. Toxicology Program showing the irrefutable connection between DNA damage and cancer.
