

Comments on Notice of Inquiry, ET Docket No. 13-84 to FCC

I live with ElectroHypersensitivitySyndrome (EHS) thanks to overexposure to a cell tower located extremely close to our family owned business which I reported in 2009 to the FCC and you did not listen. The comment I received from the FCC, "have you been to a doctor?" Thanks for your sympathy and duping our family. I have a son with Autistic-Like Behaviors that has social and learning disabilities in school. At the time of our exposure and to this date, my husband and I experience symptoms such as: Extreme pressure in the head, headaches, migraines, mood swings, anger, dizziness, pain behind the eye sockets, tinnitus, nausea, neck and back pain, joint pains, rapid heart beat, insomnia and fatigue when exposed to radio frequency radiation emitted by wireless technology such as: cell towers, SmartMeters, WI-FI and surveillance cameras. It is the FCC's duty to protect our children and people, NOT the corporate wireless telecommunications industry or utility companies! Your guidelines need to be re-evaluated for today's technology, we have come a long way from dinosaur analog technology since the enactment of the 1996 Telecommunication Act. Your research should be conducted by independent science groups, not science funded by the telecommunications industry! SAR based on a mannequin is not science. Stop protecting them or there will become an epidemic of a completely ill society unable to function. Our bodies were not created for this kind of RF/Microwave exposure!
