Date Received	Jul 12, 2016	Date Posted	Jul 13, 2016
Address	POB 6164	City	Albany
State	CA	ZIP	94706

Brief Comment

NO to fast tracking 5 G!! I have 3 concerns in this letter:

1. Tom Wheeler’s conflict of interest and disregard of emf level review--evidenced by his career advancing/promoting wireless telecommunications and his statement 6/20/16, : “Turning innovators loose is far preferable to expecting committees and regulators to define the future. We won’t wait for the standards to be first developed in the sometimes arduous standards-setting process or in a government-led activity.” Is this the Chair of the FCC or CEO of Telegrab, Inc?

2. Health--I among many thousands are negatively effected by the wireless frequencies pinging around us daily: we’re experiencing headaches, sleep and digestive problems, metabolic and emotional disruption, fatigue, and worse. Given the May 2016 study released by National Toxicology Program, a division of the US Department of Health and Human Services, that shows statistically significant increases in DNA damage and cancer (brain and heart) in male mice and rats due to cell phone radiation, this is a time to stop, review, and reconsider health effects of wireless, non-heat-producing radiation. Not to plow ahead.

3. Community control over their communities.--The current “shot clock” is essentially telling cities to “Do what corporations want or be sued.” Wheeler’s plan to streamline to an even greater degree would make citizenry irrelevant. Moratorium on 5G until health and democracy aspects are investigated, reviewed, and regulated.
