ID	6017465950	Proceeding	ET 13-84
Name of Filer	Gregory Temmer		
Type of Filing	COMMENT	Filing Status	DISSEMINATED
Viewing Status	Unrestricted	Exparte/Late Filed	N
Date Received	Sep 2, 2013	Date Posted	Sep 4, 2013
Address	5408 Eagles Point Cir Apt 403	City	Sarasota
		State	FL
ZIP	34231		
Brief Comment	The FCC non-ionizing radiation limits are unacceptable for cell phones and other wireless devices. They need to be biologically based, NOT based on theoretical limits of removing an electron from anatom. What the standards do not account for is the density of the amount of wireless devices around us. I write these comments out of being personally effected by the lack of biologically based standards. I am electro-hypersensitive and my quality of life has been directly affected by these inadequate standards. Where I work, shop, and where I stay in motels is directly impacted by the placement of cell phone towers. I avoid cell phone towers like the black-death. And in recent news,my health has gotten even worse because of the roll out of smart meters in my neighborhood. Enough! Change the standards so that people like me don't feel the energy from the wireless devices. Please do your job and protect the public's health and your health. This is like Big Tobacco all over again times 1000. I am afraid that we are going to wake up 10 years 20 years from now and find that the limits that you set were horribly inadequate, and consequently all our health will be compromised as well as infertility rates will sky rocket. This issue is so important to address. Please have biologically based standards. And remember if you don't address this issue today, I am sure this		

issue will come up on the next election. And what will the public think of the FCC when they find out that once again Big Wireless trumped the Public Health? Do the right thing, have biologically based limits.
