Attention

[Click here](#) to listen to our ad running on KNX radio!

The Los Angeles County Board of Supervisors and our Fire Chief have handed over **your tax dollars to government contractors** who are installing dangerous, high-power cell towers at your neighborhood fire station – close to your **homes, schools, and parks!**

These **50-70' high cell towers** – like the one in the picture in the right column – will emit radio-frequency radiation that will **expose firefighters, paramedics, and your family** to significant **health risks** every day.

This must stop! Sign the pledge below to keep our communities **safe**:

"As firefighters and paramedics, we live in these firehouses. What effect will these towers have on us? What are the risks to our neighbors? It's a no-brainer that LA County should at least have done a proper study before putting 200-foot high-power microwave antennas on top of our heads."

- Dave Gillotte, Active Duty Fire Captain
President, LA County Firefighters Local 1014
