Brief Comment

One of my friends had a very negative effects from 5G. When it was added to her home she suddenly could not sleep and went sleepless sometimes for days. She tried everything, doctors etc. She continued to research and the thing that changed when the sleepless began was the new 5G in her home. She got rid of it and now she can sleep again. I was skeptical so I tested it for myself and found that although I can sleep with 4G and 5G I do wake up several times during the night. When there is no 4G or 5G near-by when I sleep I sleep much much better and feel better rested. Since this time I have met people who tell me how they have had body aches and pains since they got 5G. PLEASE PLEASE INVESTIGATE 5G - THERE IS MORE TO IT THAN JUST HEAT.
