**Comments on Notice of Inquiry, ET Docket No. 13-84 to FCC by Bonnie Menth**

Pulse modulated wireless radiation gives me headaches, pain and ringing in the ears, dizziness, cognitive problems and muscle and joint aches.

An increase in exposure to wireless communication signals is going to harm many. The exposure limits now are much too high! Please reduce limits to standards similar to those of Austria and Russia.

I endorse the statement made by Joel Moskowitz, Ph.D. in his Comment filed on 02/04/2013, as excerpted below.

*"In my professional opinion, the FCC should request the EPA to empanel a Working Group composed of health experts who have no conflicts of interest with industry to review the scientific literature on EMR. The Group should recommend biologically-based EMR standards that ensure adequate protection for the general public and occupational health based upon the precautionary principle. Finally, the FCC should adopt the standards, testing procedures, and appropriate precautionary warning language recommended by the Working Group.*

*The FCC should not take any actions that may increase exposure of the population to EMR from cell phones, base stations, Wi-Fi, Smart Meters and other RF- or ELF-emitting devices. The FCC must especially protect vulnerable groups in the population including children and teenagers, pregnant women, men of reproductive age, individuals with compromised immune systems, seniors, and workers."*
