Comments on Notice of Inquiry, ET Docket No. 13-84 to FCC by Paul Stanley, M.Ed. (Educational Technology)

September 30, 2106
Aloha FCC,
I have been a Hawaii public school teacher since 1989 and a school technologist since 1992.

Since 2001 I have been suffering from an illness that the World Health Organization (WHO) calls Electromagnetic Hypersensitivity (EHS). This was caused by over exposure to microwaves (cell phone repeaters on the roof of my working place and wi-fi).

My symptoms include: a burning sensation in my head that continues and increases until I can move away from the source, a terrible sensation of pain through out the body, muscle spasms, irritability, insomnia, confusion, inability to concentrate and others. This all translates to stress on the body which can lead to a whole host of other ailments.

Radio waves are the ultimate pollutant. You can't see, hear, smell them, but contrary to what the "experts" say your body is stressed by them. Unfortunately for me, over exposure has left me with Electromagnetic Hypersensitivity (EHS).
The truth is that the FCC "safety" standards are obsolete and the evidence is that myself and others got sick.
There are many others in Hawaii that are suffering from this debilitating condition.

I've had EHS since 2004. I lost my dream job in educational television that I worked so hard to get. This job that I loved exposed me to microwave signals daily for six years until my body broke down and I had

to quit. The many cell phone antennas and microwave transmission dishes on the roof above my office pushed me beyond my body's limits.

This was just the beginning of a very long, living nightmare. The damage had been done. I could not even sleep in my own home because of my neighbors' wi-fi signals coming into my home. After twelve years, I still am injured by Electro Magnetic Radiation (EMR).

I lost my job, had to sell my home and I've spent more than $60,000.00 seeking treatment to heal this affliction. I've spent my life savings and have no money for my children's college education.

If 5G networks are implemented, my life will be even more impossible with antennas everywhere. I ask that it will be stopped until further investigation as to the harms that it creates.

Thank you,
Paul Stanley, M.Ed. (Educational Technology)
