Re: Comments on Notice of Inquiry, ET Docket No 13-84

Please revisit the FCC standards for human exposure to radio frequency radiation. I am affected by the following exposures: cell Towers while driving, computer wifi routers in the Town voting office, Libraries & many public businesses. The electric meter is being moved further away because of RF leakage into the house. I need to live in a rural area (population density is Ten ~~one~~ per square mile) and away from houses that have wifi broadcasters that emit 300+ feet.

My most problematic symptoms are confusion and memory loss during exposure: after effects are disrupted sleep.

Thank you for considering this in this country's standards on RF radiation.

Sincerely, Mary Shaffer
