

JUDGE GEOFFREY FISH, complaint

To AVOID violations, the venerable Hippocratic oath: Do. No. Harm—
ARREST MULTI-JURISDICTIONAL MEDICAL ENSLAVEMENT-MURDER CRIMES: QUASH! July
2, 2026 Maricopa County Superior Behavior Health Court Valleywise Maryvale
Order by Judge Geoffrey Fish against Amina Bennekaa, 1025 E. Moreland
Street #B Phoenix, AZ 85006; for Anti-Psychotic Medication. Permanently.
602-327-2083

The steps of grieving include anger. Within this context of “mental health”, I am within the spectrum of normalcy—as would be, any parent, whom wants the best for their child—yet, MOURNS an unlawfully decreed death sentence, especially delivered as dispassionately as did Maricopa County Superior Behavior Health Court Judge Geoffrey Fish, on July 2, 2026 at the Valleywise Maryvale Mental Health venue, at 5102 W. Campbell Avenue, Phoenix, AZ 85031. 480-344-2000.

Without a display of his oath of office, we may presume that Judge Fish operates for private interests. Be those a combination of self-enrichment or for other ulterior stakeholders, this fact frames Fish’s behavior (with a special disregard for Law, or facts).

Who might imagine that a secret little hearing could give rise to public outrage? Even though that everyone likes a sexy story, my testimonial shuns sensationalism—despite that bon vivant, Fish appeared to have entertained a circus, and he was giddy enough to have expelled me from that realm, for my unwillingness to swear-into his KLOWN-show.

Highlighting Judge Fish’s reply “ not, too, long,” to poor captive Amina Bennekaa’s inquiry, “When will I be released?”, until the end of the hearing, failed to notify a release from June 13, until said date, July 2, 2026—a 3-week protracted 72-hour only involuntary detention.

A brief study of mental health code may provide a larger framework to explain how a court order treatment for a year (plus inevitable? renewal?) antipsychotic medication with known side effects of seizures, death—an extreme punishment for an incident deemed merely a misdemeanor at point of entrance—and based upon only two flimsy testimonials by staffers at Urgent Psychiatric Care, whom reiterated false statements (ruses for dehydrating, gaslighting, prolonging detention—ploys to make appear, more grave, a situation) made on their re-petition, for a bed at Valleywise Maryvale, eight days prior.

Despite to hearing date, July 2, 2026 totaled 19 days detention between UPC, and Valleywise, no new data showed cause that Amina was a danger to herself, nor to else—after almost three weeks’ observation. Judge Fish couldn’t have been more astute to have struck those false statements, because without them, he would not have had a hearing.

But for a pre-emptive annual review (see Chronology of Events) wherein anticipatory language constructs so well a fraud to unlawfully convert a living being to chattel for enslavement, the words, “pre-meditated murder” need not be mentioned.

We might ask, to what end does this mad scheme serve—especially after a year of monthly latent active injections is expected to produce no value less than a cadaver with maimed organs—who could resell those?

Without even entering Amina's NON drug addiction status, nor otherwise showing that Amina was dangerous to herself, or to else, Judge Fish's extreme death sentence for anti-psychotic medication with side effects of seizures, death against Amina serves not only a double penalty—for one whom is already a victim to sexual abuse, seeking a lesser invasive trauma informed nervous system regulation care—but moreover, grossly exaggerates an initial intake for a mere misdemeanor, in a reckless, unjust system, operating as some sort of commercial exchange—diffident to health or safety.

After almost four weeks' detention fail to produce proof that Amina S. Bennekaa is a danger to herself or to else, Judge Fish's COT for anti-psychotic medication is baseless and must be QUASHED, or remediated for treason—or do Arizonans want their tax dollars to cover cruel and unusual schemes for hapless sailors?
