August 31 / 26

Hello from Kathie Wallace

I trust you all have had good holidays.

I am asking you to hold a public information session on wireless radiation - just sharing information from a Frank Clegg video & Cece Doucette radio that I have sent you as well as local expert Lori Curran speaking & myself & my lived experience. I am very, very ill from radiation.

I am booking the Golden Circle for that session Oct. 21/26 for 7:00 p.m.

Wab Kinew is banning social media for children under 16.

Bobby Kennedy is banning all phones in school.

There is growing awareness globally that radiation is harmful to us. Beamobile China now has 10G mobile 6G is being installed here in Red Deer.

We citizens of Red Deer have the right to have our voices heard. There must be public consultation on this matter. I am holding you all to your assurance that you are our guardians for a safe and healthy community.

I look forward to this engagement.

I also look forward to confirmation that you all are in support of this dialogue with us Red Deerians.

You now have proof of the high radiation levels here in Red Deer.

Let's act together for the highest good for us all, as Indigenous peoples say to ensure that we do no harm to each other.

Sincerely,
Kathie Wallace

P.S. Thousands & thousands & thousands of Red Deerians are ill & do not know the cause. We MUST care for each other. It is wireless radiation. Go out to Piper Creek garden & experience the difference in a living surrounds with low radiation. PLEASE help us.

Some RedDeer Hot Spots for Wireless Radiation

Measured with Safeliving Tech Inc.'s RF meter reader (Safe & Sound Pro II 200 MHz–8GHz Broadband)

* <1.5 microwatts/sq-meter is safe *
