

**Kathie Wallace Health Concerns from electric radiation since moving into my apartment #105
3307 51 Ave Close Red Deer AB Canada T4N6H9 in the summer of 2022 403.356.1101**

30 SMART electric meters are being installed in the next few weeks in the utility room on the other side of my living room wall.

I took meter readings of hot spots for electric radiation here in Red Deer May 17, 2026. The readings in my apartment were 245,000-259,000 microwatts measured with a Safeliving Tech Inc's RF meter reader.

There was no public hearing before these meters were installed and I have got no help from local authorities here..

I fear the effects of these SMART meters on my health.

EMF electric radiation expert, Cece Doucette, Director of Massachusetts for Safe Technology, has stated that the safe range for electric radiation is .5 microwatts. In the article "The Problem with SMART grids: Dumb and Dangerous" states that a SMART meter pulses 229,000 mw several times a minute. **30** are being installed on the other side of my living room wall. I am unable to fathom the toll it will take on my body when a constant 259,000 mw has been so devastating to me for 5 years. It is life-threatening. Human life thrives at a resonance of 7.83 Hertz....the Schumann resonance.

Symptoms-These symptoms below come and go but I always constantly have felt sick and that I am going painfully blind for 5 years. I am always crippled in pain.

-rash groin, waist, under breasts

-scales and lesions

-pain and headaches-headaches and sharp stabbing pain into brain like a knife, gut pain, joint pain, ear and arm pain, pain jolts up my feet and leg cramps in middle of night, crippled with pain so I can't stand up straight in the morning

-brain fog, so hard to think, forgetfulness, can't remember things

-inability to walk properly-staggering, walking so slowly with difficulty, fall over in middle of night sometimes when I get out of bed, vertigo

-massive itching all over my body

-constantly fighting the cold/flu, sore throat and gums, nose running constantly, serious cough

-falling in the winter time on ice and snow

-feel like I am **going blind** and blurry eyesight and eyes screaming with pain and can hardly see ALL of the time

-nausea

-bleeding from my anus

-hair falling out

-sweating on/off sweating day and night and feeling like I am being boiled alive from the inside

-insomnia and waking up repeatedly in the night

-chest pain and felling like my heart is being super squeezed

-severe **depression and suicidal thoughts with deep feelings of dread and fear** shuddering through my body in middle of night when I wake up

-extreme exhaustion

-diarrhea

-obesity

-feel paralyzed and in a vise squeezing me to death -both body and mind feel **frozen in molasses** with very little life force energy-body parts do not move freely and easily

SMART meters have a frequency of 2.45 GHz. Canadians for Safe Technology (C4ST) and Frank Clegg have called for Health Canada to update its recommended limits for human exposure to electromagnetic fields in the frequency range of 3 kHz to 300 GHz set in Safety Code 6 (2015) which includes the limits for 5G technology.....being installed in Red Deer NOW. As well, Bobby Kennedy and the US's HHS are currently investigating the effects of electric EMF radiation on all sentient life and requesting the FCC update its guidelines....which it was ordered to do 5 years ago...and didn't.

I am asking for a halt and a moratorium on these SMART meter installs as well as other electric technology- cell towers, data centres and 5G installs-to allow a full, neutral, scientific study of electric radiation as well as a public hearing FIRST.

Sincerely,

Kathie Wallace
