Name of Filer	Linda Hart		
Type of Filing	COMMENT	Filing Status	DISSEMINATED
Viewing Status	Unrestricted	Exparte/Late Filed	N
Date Received	Sep 2, 2013	Date Posted	Sep 3, 2013
Address	279 Sunnyridge road	City	Burnsville
		State	NC
ZIP	28714		
Brief Comment	Comments on Notice of Inquiry, ET Docket No. 13-84The current RFR exposure limits have impacted my well-being and caused me to experience healthproblems. I have for 20 years had to avoid wireless devices such as Wi-Fi and cordless phones inthe home. Their presence always induced an inability to concentrate and deep brain fog.When a smart meter was attached to my house I immediately experienced an inability to mentallyfocus and exhaustion. Upon continued exposure this developed into a deep inner ear pressure, heat,and pain. I had to camp out away from my home for months until I could get an opt out option inwhich the transmitting module was removed.Now that I have been sensitized by exposure to a smart meter, I experience this deep ear pressureand pain when around RFs that did not previously affect me. The Dect phones and Wi-Fi?s that areubiquitous in most public buildings and private dwellings make it very difficult for me to go anywhere.Electrosensitivity is one of the most limiting disabilities one can experience in our wireless world. Thissensitization is permanent and avoidance is the only recourse.Please lower the RF exposure limits to truly protect the population, and especially those of us whoare most vulnerable, from the non-thermal health impacts of RF.		

Comments on Notice of Inquiry, ET Docket No. 13-84

The current RFR exposure limits have impacted my well-being and caused me to experience health problems. I have for 20 years had to avoid wireless devices such as Wi-Fi and cordless phones in the home. Their presence always induced an inability to concentrate and deep brain fog.

When a smart meter was attached to my house I immediately experienced an inability to mentally focus and exhaustion. Upon continued exposure this developed into a deep inner ear pressure, heat, and pain. I had to camp out away from my home for months until I could get an opt out option in which the transmitting module was removed.

Now that I have been sensitized by exposure to a smart meter, I experience this deep ear pressure and pain when around RFs that did not previously affect me. The Dect phones and Wi-Fi's that are ubiquitous in most public buildings and private dwellings make it very difficult for me to go anywhere. Electrosensitivity is one of the most limiting disabilities one can experience in our wireless world. This sensitization is permanent and avoidance is the only recourse.

Please lower the RF exposure limits to truly protect the population, and especially those of us who are most vulnerable, from the non-thermal health impacts of RF.
