

I would like to take this opportunity to report several incidents related to the illegal crime of Directed Energy Weapons use, RF/EMF-based crimes. I am reporting them all together because they need to be taken in context to be understood and properly addressed.

1. Ongoing crime of aerial stalking, harassment and Directed Energy Weapons (DEW) attacks. There continue to be an inordinate number of aircraft which fly over and very near my home (and places I go, including my places of employment) in a vast array of vehicles small and large, some of which attack me with weapons as indicated by associated pain and detection. I am also frequently surveilled by drones disguised as birds, and was physically attacked with COVID virus poison by a drone in Summercamp/St. Teresa Beach on 11/26/23.
2. (At this place this same weekend, I witnessed what appeared to be the trafficking of 10-12 blonde children under the age of eight by a man that has stalked me previously, carrying a can of beer and a turkey leg – not looking like someone entrusted with such a large group of small children that didn't look like him-the homeowners there may have films).
3. On 10/23/23, I was awakened at 6:15 am by sudden and intensely loud rounds of gunfire on the parking pad behind 4580/4568 Running Meadows Ln. I filmed the debacle, although it was not fully light. The person began mixing in fireworks after about 10 minutes, and continued the harassment for two hours! Evidently, no one called the police. Oddly enough, two months later on 12/20/23, there was a severe garage fire about a hundred yards from where the barrage occurred. If it was caused by an electrical fault so be it, but who knows what the barrage included that would have affected it.
4. On 11/15/23, the police were called to my home during an argument. I was on my way to an appointment when this happened. The next day a LCS officer called me and asked me how I was doing since being harassed, defrauded and physically blocked out by a partition nailed up in my home by an unknown subcontractor. On Christmas Eve 2023 around noon, this same officer followed me into the CVS on Magnolia and stood quietly in the next aisle listening while I talked to someone on the phone about cold medicine. He was not shopping and was practically hiding his face in the merchandise. So a year to the day from getting shot at in my home, I am stalked by a LCS officer. (Attached is a picture where the “stick” hit my doorjamb, working on ending my life in an ever so haphazard way seven inches from my head).
5. On 2/18/24 at 4:10 pm (a clear, sunny day) I was taking a walk down to the dead end of my street when there was a sudden, loud and violent explosion high in the trees behind 4373 Scawthorn Dr. The explosion had a weird implosion, muffled-type vibrational sound to it, different from gunpowder. I was extremely startled, and was the only one around. Within about 2 minutes a man drove by me in a gray truck, went to the dead end and came back by, I guess to see if he was successful in harassing me. I took a picture of his plate. I didn't bother to report the explosion to the police, as it seemed like a directed energy or laser weapon shot solely to terrorize me, about which they hadn't assisted me previously. With the lengthy, bold-faced felony firearm barrage, the (unrelated?) garage fire and the directed energy or laser weapon use at the tree tops all right across the street and within four months, I sense intentional harassment. I am terrorized by the criminals committing the two incidents involving explosions (10/23 & 2/18).
6. On 3/27/24 I was stalked by 10-15 members of the Leon County Sheriff's Department, coming out in waves all refusing to look up and around, and overdoing the marching like zombies in the light rain – they mostly had hats on anyway. One guy was holding back from laughing as he was embarrassed by the sick “street theater” mob-stalking act. I thought they were coming out of the Chipotle as if a wake had been held there, then I saw two couples in the Infraguard with new babies. So they stalked me like wicked zombies to mock and harass me after a baby shower lunch. (Attached is a pic of the fun skit they put on; mind you this was just about a third of the

officers – I actually had time to drive around the lane twice and film them all, the skit was so long.)

7. On 3/28/24, I went to a large empty parking lot of a storage space rental building and parked in the shade to eat my lunch and birdwatch as I had done a couple of times in the preceeding month. On 3/28/24 there was a female Leon County Sheriff's deputy a few spaces down, play-acting in an offensive way. After so many of them had stalked me the day before, I know she was there intentionally to stalk and harrass me, invade my privacy and behave in a mocking way toward me, with hundreds of empty spaces in the lot. I took her picture and she put a black box up against her passenger side window at me. She was there because of me, and that is stalking and harassment.
8. So many nights I have cried trying to understand why this young woman with a pony tail has disdain for me, someone she does not know and does not know anything about, with no record, suspected of nothing, never having been provided due process for a single charge. The only thing I can think of is that, during the Macy's incident when I was roofie-gassed, led to a dressing room, molested by two women, and men wearing neon-colored condoms and then rendered fully unconscious, a sex video was made to portray me as a conscious, active participant. I have to guess that she has ill will towards me that is unfounded and stalks to terrorize her fellow Tallahasseean. Luckily, my priest has been willing to talk with me about the hurtful emotions arising from the harassment and likely laser or directed energy weapon abuse perpetrated by she and other officers. It is possible that she has been "brainwashed" or "beam-compromised" by the newer military technologies to do wrong, but the CIA needs to eliminate codes 3 and 4 from the Terrorist DataBase so the terrorization of 400,000 innocent people ends. If I ever get compensated by the Victim's Compensation Fund, or through a revised Havana Syndrome Act (AHI) that helps innocent civilians, I would use the money to get all the harmful misinformation and disinformation of and about me off of the internet and out of the community. I don't deserve any such libel and slander. I complained about excessive gun use in a neighborhood where small children played to LE, about real estate fraud to the FCC, and about the COVID vaccine making me very sick to the CDC. For these actions, I have become the recipient of agonizing attacks of pulsed microwave mind control and torture, including voice-to-skull, EMF burns and rape, harassment including organized stalking and psychiatric fraud. Because I complained about guns, fraud and the jabs, they began slowly killing me in a mind control program for Americans, specifically older people with homes, most of whom are women (70%), probably because women are more vulnerable. There's already almost a half million people in the secret program (Terrorist Screening DataBase, Categories/Handling Codes 3 & 4), where you are not notified, charged with anything, or afforded due process. They are doing it for money – federal tax dollars, to be specific. There are no alien spaceships of the devil that came and make them do it! Also, some experts indicate that 10-13% of the population has already been compromised cognitively due to "beam-forming technologies". So the money made through the false terrorist label by government criminals is, in part, made possible by cognitively compromised members of the public, unwittingly scanning biodata, stalking and doing fake "street theater" skits for bitcoin or cryptocurrency on Impersona.com. They have no idea their actions are part of the criminal government mind control program veiled as the Terrorist Screening Database. So when you see someone who is unbelievably overzealous with regards to infringing on the civil liberties of another, or astoundingly in an excessive extension of aggressive judgement and control, this is a cognitively-affected human being, programmed to take power and much else from you and others. On top of that, I connected with a fellow TI in California, and she was using Dr. Robert Duncan's books on the technology to help me and sent me one, and then a couple of weeks later, he was murdered. I have his book, inscribed by my role model TI, with a glittery heart, dated on a day when we had hope for him saving us from

the murderous technology and its' operators, and even the species, with his existing and forthcoming new book. But they snuffed him out. Torturing someone by mind control to make them commit suicide is murder. Our own government is murdering us, slowly and secretly. The CIA/FBI won't give the names of the 400,000 because then everyone would know they are completely innocent people, some even 3 year old toddlers, 80 year old women and blind people! Labeled as TERRORISTS! And me – an Accounting/Legal Program Administrator, harmed in horrific, heinous ways, every day and night. I have the medical tests to document this fact. I usually end up crying too much to read and understand the book, but I will keep trying...it leads to prayer, also. Americans need to wise up and read and understand Dr. Robert Duncan's book Soul Catcher to understand what has or will come their way. It's hard to believe it, but once they label and begin in on you, it is a gruesome existence. You'd agree that the targets on the TSDB deserve relief sooner than say, society, if they're claiming they've been turned into Borgs by the three-pronged sock it to 'em program of depopulation that includes our cell phones, weaponized towers/satellites and the jabs of metals, right? We are probably all doomed, but you could help we targeted individuals to douse these bastards at the CIA in the hopes that it will also quell them enough to keep them the hell off the rest of the species! Please, get rid of those special handling codes while there is still time to save the country. We must ban neurostrikes/DEW use, and neuro-rights invasions at once. The jabs have so much foreign metal technology, that MAC addresses are emitting from graves. Our blood is now fluorescent, and if you are tortured with electromagnetic frequencies, you can easily see this evil worldwide plan that is likely by the CIA criminals as well.

9. On 4/22/24 at 5:51 I had walked 6 minutes out into the Fred George Basin Greenway main trail. When I went to walk back on the big open path slightly to the west, someone began shooting guns in the woods within about 40 feet from me, including some that sounded like cannons. There was no one around, and I was terrified. I went as fast as I could back to my car on the main path. Back at the parking lot, the 10 or so cars were all still in the same place, a bunch of small sedans without the usual tint FL sedans would have. One guy then stalked me by walking in front of me with ever-so-convenient timing exactly upon my rapid exit, on the sidewalk of the main road at the exit, wearing a purple T shirt and carrying the requisite, contextual thermos – on the coolest day we had had in weeks. Right before that I saw a white, unkempt 30-something male in a white Tshirt who looked like a gun perpetrator, and not like a nice hiker-man in his 30's, just out for a short jog along the edge of a vacant greenway trail adjacent to its oddly populated parking lot.
10. On 6/3/24, I witnessed 2 sets of young adults trafficking 3-5 minor children, arranging for them to participate in organized stalking and scanning for money, power, and/or crypto-currency gain. This was in the vicinity of Old Bainbridge Road and Tharpe Street. Within 1 minute of seeing the bands come out to scan me (I am “scannable” since illegal chip insertion) and stalk me at the road, I saw a Tallahassee Police Department officer patrolling nearby. Maybe this was supervised visitation pertaining to parenting or something, but it did not seem like normal behavior for parents, children and the police.
11. On or about 5/9/24 or 5/16/24, I witnessed two adults enter the office building which houses the law firm where I worked. I then at approximately 4:30 in the afternoon audably witnessed the odd and disturbing sounds of muted directed energy weapons, bearing more vibration and audible evidence, it would seem, than ordinary gun and firearms explosions. Others in my office heard it as well, I came to learn. A few days or so later, I noticed they had cracked a 9 foot crevice in the large tile hallway right outside the firm's office. There were circular marks in 2 or 3 places, like the end of a gun had been fired there, and several other odd markings. It was not a crack made by a cart or anything like that. The crevice appears to go down 2 or 3 feet into the floor. My employer had been told I am included on the Terrorist Screening Data Base,

handling category 3 or 4 as a non-investigative subject, and I heard my associate refer to me as a terrorist when he thought I could not hear him two months earlier. My employer must have become afraid of repercussions from association with someone falsely labeled as a terrorist threat and let me go less than one week later. The horrific, terrorizing vandalism likely cost the insurance company of Persimmon Hill thousands of dollars if not more...it should be recognized as domestic terrorism. The vandalism was perpetrated by subcontractors engaged in activities to discredit me, as hired by the CIA, FBI and Fusion Centers to conduct mind control programs on unconsenting US citizens, an act of treason. In supporting the efforts of these government criminals to control the minds of others through surveillance and torture by stalking, scanning and using directed energy weapons on me, the Leon County Sheriff's deputies, the Florida Highway Patrol troopers and the TPD officers are guilty of the atrocious vandalism at Persimmon Hill indirectly. That female LCS should stop thinking a little school girl stalking-mimicing-fun is a harmless, interesting gig, because no one is fooled. Criminal LE are supporting and clearly associated with the deep state criminals who caused an extremely violent directed energy weapon explosion that caused thousands in damage and could have easily harmed or killed others.

12. On 5/15/24 while driving home at 7:45 PM I began being followed by a Florida State Trooper on N. Monroe St. near I10 in Tallahassee while heading north. I felt the sharp, deep pain of a directed energy weapon hit my neck. I can identify the pain they cause as I have been tortured with them since 3/4/23. I slowed down a lot because I was shocked and recoiling from the assault. The trooper was right behind me until I made a left on Talpeco Rd. I reported this assault to the Florida Inspector General.

I am a victim of the current neuro-war, having been illegally implanted, surveilled and stalked, as well as tortured with directed energy weapons since 2021. I am a victim of hate crimes, civil rights deprivation, crimes against humanity and treason. Some of the crimes committed against me include that I have been assaulted three times in stores, twice in my home, and I was shot at in my moving vehicle twice. I was rendered unconscious two of the times, once in a Macys and the other time in my home. I reported most of the assaults to the police in NY, including twice in person at the Troop E barracks in Canandaigua, NY, who then harassed me with helicopters for complaining and committed psychiatric fraud against me in retaliation as well. I also reported crimes to the Border Patrol, and the cities of Baldwinsville, Syracuse's Parks and Auburn, NY.

I have been diagnosed with Havana Syndrome (defined as Recurring Non-Kinetic Brain Injury/rNKBI) by neurologist Dr. Lydia Shajenko of NJ, as well as have had NLJD /RF body implant/thermal scans by certified professional Jesse Beltran. I am a plaintiff in a worldwide Class Action lawsuit against the US DOD for covert surveillance and torture through Todd Callender, ESQ of IL. I am a member of Targeted Justice, as well as of People Against Covert Torture and Surveillance, Intl. (PACTS, Intl). I have a notarized affidavit of the crimes committed against me (which I periodically update), and have retired Police Chief Daymond Jones of TX under contract to assist me. I hired a counselor to assist me with the ongoing trauma I experience from torturous DEW attacks, vehicular assault, illegal surveillance and stalking, Cathy Meadows, CP of MA. I am also under the care of an Internal Medicine specialist as recommended by Dr. Ana Maria Mihalcea with EDTA Chelation, Methylene Blue and CDS therapies for the damaging nanotechnologies in the COVID 19 bioweapons, as well as for the microwave weapons damage. I have notified the Governors, Attorneys General and Inspectors General of both NY and FL, along with the Senators and House Representatives of both states of the crimes I have and continue to experience. President Donald Trump has also been advised. For your information, I am taking legal action against NYS Police Troop E, HCA Florida and a city of Tallahassee employee, among others, for psychiatric fraud. The LCSO has falsely labeled me as mentally ill and is unwilling

to take a report of the repeated projectiles hitting my home, vehicle and person. I work full time in positions of fiscal responsibility, despite the effects of the DEW torture, to quell the libel and slander the LCSO perpetrates against me.

I regret that LCSD's and FHP's are compelled to hate and harm toward murder a fellow Tallahassee and complete stranger – I regret that they were given some sort of false video or audio or information that led them to believe that I am a bad person who did bad things that warrant hatred and torture. Perhaps they believe the world should be depopulated and that they have the right to do it in this way. It's truly murder, though. I regret if their ability to know and do what is true and right has been compromised by the new control technologies. I wish the individuals I saw would know that I am fully innocent, and that if these criminals see fit to shake my brainstem nightly with the weapons considering I am an innocent citizen, they will see clear to shaking the brainstems of LCSD's and FHP's soon enough., and those of their children and grandchildren too. Do they not realize assisting government criminals and their subcontractors assures their own demise by similar methods, and at a speedier rate at that? I am an innocent American woman who complained to the CDC about ill-effects from the COVID vaccine, reported some illegal gun use and filed a complaint with the FCC about real estate advertising fraud! I am Catholic. I do not belong on the Terrorist Screening Database or any associated lists because of my choices and attempts to stop crime. It is an infringement of my civil rights to make up secret reasons for surveilling and torturing me, and then do so. It's shameful. These are crimes perpetrated by misogynists, and it is time for the States to stand up to the CIA, FBI and Fusion Centers and abolish Codes 3 and 4 of the TSDB. The lists slandering we innocent 400,000 in circulation must be rescinded and denounced. In aiding and abetting the government criminals committing these crimes against me, everyone doing so, including perpetrators of the Florida Highway Patrol, the Leon County Sheriffs Department and the Tallahassee Police Department are guilty of treason as well, which is punishable by 5 years on up to death. In some way, I am compelled to report to the insurance company of Persimmon Hill that I saw and heard the would-be Infraguardsians there to use the weapons, was terrorized by them, and then stalked by the deputies right around then as well, as they too have a part to play in the MK Ultra / Cointel Mind Control for money and power program. The stalking law enforcement officers are, by their associated actions, guilty of the neurostrike vandalism on the building and should be held accountable. They are around, furthering the deep state's "hurt Barbara Bennett for power and money" agenda, supporting crimes like terrorizing explosions that surely cost that insurance company thousands of dollars. They planned an illegal, coordinated effort to terrorize me because that is what they do to TSDB listees/non-investigative subjects handling codes 3 & 4, who are innocent U.S. citizens guilty of meeting a secret criteria for which there is no due process. Of the 100,000 of us "awares", 70,000 are women and they rape us psychotronically, so it actually is many misogynist-minded criminals, although there are many women in power at the CIA who are willfully ordering my slow torture to murder. They target women, jealous and fearful of their independence and strong minds to take their successes away, including real estate, careers and family out of vile hatred. The violent microwaving of the brainstem nearly nightly as we sleep is so disruptive, it causes our shoulders to frequently be on the brink of dislocation. It is hard to keep a job and function in life when the CIA and FBI are doing this to you. To them I say, if you want to continue stalking me and harming me with invisible weapons, or subcontracting others to do so, please know you are seen, your weapons detected, and many others now, and more soon will, know what you are doing, why and how. I hope and pray there are enough non-compromised, non-beam-formed individuals left in our country and on the planet to end the sickening madness being caused by these government criminals. It is disturbing beyond the pale that 10 of the 12 employees of the law firm at Persimmon were influenced through fraud and/or beam-forming and/or bribery to scan my biorhythms/data with their phones. They pretended they were not invading me, stealing and broadcasting my most intimate personal data for three months straight, without a thought or care in the world about my privacy and the immorality of

such an act. They treated me like a thing that was not alive with a God-given heart and sound mind. Florida and New York **must** follow suit after Colorado, New Hampshire and other forward-acting states with modern laws that address current crimes of advanced technologies and criminals. We must eliminate handling codes 3 and 4 from the Terrorist Screening DataBase, and free we 100,000 “knowing/aware” surveilled and tortured innocents, as well as the 300,000 “unknowing/unaware” innocents. The CIA and FBI told 18,000 law enforcement agencies, more than 532 corporations, 1440 organizations and 60 countries that I am a “Suspected Terrorist”! This harmful evil stigma irreparably damages all facets of my life for my remaining time. And for that I am entitled to victim's compensation, under the Havana Act, which must be expanded to cover civilians-they only gave them health insurance coverage anyway. So all that entails is the health industry acknowledging something other than delusional paranoia. A pathetic bandaide on a crime coming to end your life and that of your family's. Please help us end this heinous crime at once, before the CIA and FBI torture to suicide/murder anyone else. Please. They are perpetrating this horrific crime on blind people, babies and 80 year olds! Lockheed is murdering whistle-blowers so obviously, it is no surprise they are actually one of the 532 corporations that are torturing the half million Americans.

I am not able to recover adequately until the cause of the pulsed microwaves is stopped. To whomever is reading this, I strongly encourage you to do what you know is right for that reason, and to know you have an obligation to end ULTRA before we reach a point of no return.

I am not afraid to tell on this person/these people because I am honest, ethical, certain of actual facts and innocent of wrongdoing. Time is of the essence and justice is sought as I am being slowly microwaved to lead to death. People who are assaulted with directed energy weapons whose brains are made or become aware of it, are able to discern the difference between induced and natural pain. It's instant agony! For your information, most persons attacked with any one of the seventeen patented V2K (Voice-to-Skull) technologies are able to discern the voice of their own mind. It is horrifying that LE/the Military would participate in an “Isolate and Removal program” of the CIA's/FBI's used to slowly kill innocent Americans for financial gain. I believe such felonious war criminals are acting of their own volition and/or may in part be compromised psychologically by the existing technology and/or may be incentivized. People that have been rendered unconscious through assaults and then “chipped” can be human energy trafficked for profit, resulting in neuro-rights infringement and death. It is my understanding that on Impersona.com one can invasively scan someone's body once setup, obtain biorhythm information and mine crypto-currency for financial gain, rendering others cloud computing nodes, or Cyborgs, as the military calls it. They assigned we targets CUSIP #'s years ago, and the shot they have put in all babies heels for 65 years may well have been the first basis for RF effects on one human being by another. The last thing I can tell you is that this list is over 2 years old and you would be shocked and further terrified to read of everything they have since done to harm me.

Please know that plausible deniability is a main component of the wretched targeting program they are conducting on innocent Americans. Thank you for your time and attention to this important matter.

Barbara Bennett
