Brief Comment	My body collapsed when a streetlight went up outside my home. I was diagnosed with Radiation Toxicity from EMF, Initial Exposure. 4 M.D.'s tell me I have to leave my home to heal and get away from cell towers. I find almost no where to go to heal from extremely severe debilitating emf symptoms, and end up, isolated and unsafe in only 2 wooded areas in the whole of the Blue Ridge Mountains as most are covered in cell towers. I am having severe issues finding any place to live. The American with Disability Access Board has recognized EMF sensitivity as a disability. The Institute for Health and Environment, who's director has over 400 peer reviewed studies, lists Harm From EMF as the 2nd top environmental health issue. Dozens of people have contacted me with similar debilitating symptoms, but have not found a doctor familiar with the diagnosis. EUROPAEM EMF Guideline 2015 for the prevention, diagnosis and treatment of EMF-related health problems and illnesses DOI 10.1515/reveh-2015-0033 October 13, 2015 by European Academy for Environmental Medicine is a respected peer reviewed document. Also a good resource https://mdsafetech.org/ The FCC's failure to protect public health is harming me, my family, my community and our planet. The science is clear: radiofrequency radiation is harmful to all biological organisms (see the Science at Physicians for Safe Technology, https://mdsafetech.org/). We need non-thermal radiation exposure limits based on the peer-reviewed independent science (see https://mdsafetech.org/conversion-and-exposure-limits-emr-emf/) Please do your job and protect the		

minimize environmental risks, as you see and protect the public and our planet instead of the wireless industry's thirst for innovation and profit. Citations and links hereby incorporated by reference.
