ID	6017339272	Proceeding	ET 13-84
Name of Filer	Jessie Ellis		
Type of Filing	COMMENT	Filing Status	DISSEMINATED
Viewing Status	Unrestricted	Exparte/Late Filed	N
Date Received	Mar 4, 2013	Date Posted	Mar 7, 2013
Address	266 Poverty lane	City	Lebanon
State	NH	ZIP	03766
Brief Comment	This is such a serious alert, affecting many thousands of decent people, who already are experiencing the harmful effects of unsafe radio frequency levels. What of our country's future, if we continue to harm thousands upon thousands more people, without any genuine biological-medical basis for allowable radio frequency levels? The 2012 bioInitiative Report is incorporated by reference herin in its entirety (http://www.bioinitiative.org/) The installation of the new smart meter on my previous home's water line caused me severe illness immediately, and in following months almost killed me. I developed life threatening heart, respiratory and digestive problems, causing me to become far underweight (under 100 lbs), and severely electrically sensitive- so much so I could no longer drive my car, along with many other limitations. Even after my Doctor helped to have the smart meter removed, my illness (though not as severe) was still very compromised by nearby smart meters. I had to move from my home of many years, to stay alive, and lose much of my savings. This nightmare experience continues on, since many people who are sickened by these meters cannot appreciably recover- I'm one of them. If you care about yourself, family, any people at all, then take action to correct this terrible wrong!...that has no upside, except perhaps a few are making lots of money from it. I endorse the statement made by Joel Moskowitz, Ph.D.		

in his Comment filed on 02/04/2013(<http://apps.fcc.gov/ecfs/comment/view?id=6017161984>), as excerpted below. In my professional opinion, the FCC should request the EPA to empanel a Working Group composed of health experts who have no conflicts of interest with industry to review the scientific literature on EMR. The Group should recommend biologically-based EMR standards that ensure adequate protection for the general public and occupational health based upon the precautionary principle. Finally, the FCC should adopt the standards, testing procedures, and appropriate precautionary warning language recommended by the Working Group. The FCC should not take any actions that may increase exposure of the population to EMR from cellphones, base stations, Wi-Fi, Smart Meters and other RF- or ELF-emitting devices. The FCC must especially protect vulnerable groups in the population including children and teenagers, pregnant women, men of reproductive age, individuals with compromised immune systems, seniors, and workers.
