ID	6017465343	Proceeding	ET 13-84
Name of Filer	Victoria Jewett		
Type of Filing	COMMENT	Filing Status	DISSEMINATED
Viewing Status	Unrestricted	Exparte/Late Filed	N
Date Received	Sep 2, 2013	Date Posted	Sep 3, 2013
Address	1405 Seville Road	City	Santa Fe
State	NM	ZIP	87505
Brief Comment	Current FCC limits for human exposure to radio frequency radiation are already set way too high. I am unable to tolerate the proliferation of 4G technology, especially the 4G cell towers. I am also unable to be in a Wi-Fi field, or near a cordless telephone base unit. This means that I can hardly go anywhere, including theaters, coffee shops, hospitals, municipal buildings, etc. I cannot travel because I cannot stay in any hotels. I can no longer work as a librarian. When I am exposed to these currently-legal levels of radiation I get a headache, nausea, and dizziness, and I feel weak and sick all over. I cannot sleep in these fields. I have moved out of the city of Santa Fe, and feel the radiation intensely when I go into town. I know many people who are being similarly injured. Exposure limits need to be drastically lowered!Current limits are thermally-based and do not protect real people who are exposed 24/7 against our will. I implore you to address the growing numbers of people injured and displaced by this technology.
