I am writing to tell you that the current rf radiation exposure limits are very high and should be completely lowered. I have been injured by rf radiation that complies with the current exposure limits. These limits do not right now account for biological needs and responses. Cell phone towers should not be put on private dwellings, hospitals or nursing homes, or schools. The landline switched telephone network must be maintained. Smart meters should not be mandated nationally. There is too much radiation being emitted.

I have been very ill from exposure to the cell phone antennas on my roof for many years. It changed my life and made me disabled in many ways especially making it hard if not impossible to participate in many activities where people always use cell phones, which at this point is almost everywhere. For example in public transportation, or religious meetings, theaters or almost anywhere that people gather, or in offices or where there is high exposure to cell phone towers. I cannot use a cell phone. I have immediate and long lasting reactions to it with burning in my ears and redness and burn marks on my skin and long term pain and interference with hearing.

When I first ever used a cell phone probably in 1999 I never heard any frequencies or noticed any problems. But I had rarely used a cell phone nor did any of my colleagues. It was after the tower was placed on my building that I began to hear the frequencies and respond to them and with each passing year I became more and more sensitive to emf radiation because of the constant exposure in my home all around me. When cell phone towers were turned on on my roof, we could immediately feel a magnetic pull, many small shocks all over the body, and hear a high pitched frequency which never ceases. Sometimes there are several frequencies and pitches overlapping. I was in extreme pain, suffered a seizure, and had female bleeding for many weeks. Those living with me also heard constantly an undercurrent of noise and high pitches. I had to leave my home for several months. Burn marks on my skin near the pelvic area appeared and have continued and grown larger over many years. Too much rf radiation often causes me to become dizzy, to lose my physical balance, to feel the room is spinning, sometimes to have to sit or lie down on the floor to make the spinning stop, often to feel nauseas, and to be extremely hot on the skin. It also interferes with sleeping. These are symptoms of radiation illness. Blood pressure has gone up sky high, with heart palpitations and migraines. A pain in the back of the head near the occipital ridge often recurs with a feeling of a constant beat or pulse being very prominent for many years.

RF radiation is very dangerous and is also affecting the pollinators - the bees and butterflies and other beneficial insects who are too sensitive to the frequencies, and radiation. These help our food chain. If we have no pollinators we will not have food. The radiation of the towers and constant increase of frequencies and all of the radiation we are being immersed in is causing health problems and the endangerment of our food for the world!

This must be curtailed and a return to many analog devices be made. The wireless radiation is causing US and worldwide, health problems, cancer, genetic changes in all life forms and contributing to the global warming and terrible weather conditions of storms.

In my home also all the pets suffered catastrophic illnesses with unusual and enlarged tumors of cancer from which they died. The frequencies especially affect the heart beat.

The frequencies and emissions must be lowered. I cannot use a cell phone for daily and or regular communication. There is at least 3% of the population who have the same difficulty. (about 10 million people).(That is those that are known).

It is hard to reveal these personal issues but it is paramount to inform you, those who would change the system of phones. I want to be able to communicate with people. If I have to use a cell phone I will not be communicate with others. I want to be able to communicate and enjoy the freedom of our wonderful democracy here to choose the type of voice phone I need. It is of utmost importance maintain the switched telephone network.
