AFFIDAVIT OF (Your Full Name Here)

State of Washington]

King County]

I, Suzanne D Morris attest that my statements are true to the best of my knowledge.

Comment round for ET Docket No. 03-137 and WT Docket No. 12-357.

1. My name is Suzanne Morris . My address is 7306 NE 140th Place, Kirkland, WA 98034.
2. I am a Marriage and Family Therapist
3. I am an individual who is very sensitive to electromagnetic radiation. Approximately a year and a half ago, I began having symptoms of dizziness and nervous system problems including tendonitis upon waking that cleared later in the day. Like most people I had a cordless phone system, a wireless modem, a cell phone, fans in the summer, pole lamps and several computers in my home. I had no idea of the risks posed by these devices to my health. When I measured the EMR emitted by these devices, the readings were greater than 2,000 microwatts/m² for each of these devices. I also started hearing a high pitched pulsing sound that was a consistent 60 beats per minute which an electrical engineer told me was the cycle for electricity. I got rid of wireless in my home and use my cell phone very judiciously leaving it off most of the time. I also started sleeping under a Faraday canopy because the RF off the cell tower across the street was way beyond the healthy levels that Building Biology has indicated. I immediately started feeling better.
4. Dozens of scientific studies have shown negative impacts of EMR on human health, even at low levels of exposure. The most commonly accepted guidelines are the Building Biology recommendations that list 1,000 microwatts/m² as the threshold for “extreme concern” (http://www.baubiologie.de/downloads/english/richtwerte_2008_englisch.pdf). On May 31, 2011, the World Health Organization's International Agency for Research on Cancer (IARC) classified radiofrequency fields as “possibly carcinogenic to humans.”

The FCC does not use biologically determined guidelines that affect health, but rather uses a standard that measures thermal heating of biological tissue. The premise that there are no adverse impacts of EMR on the human body until it is cooked is completely ridiculous.

5. I urge the FCC to adopt new RF safety guidelines that take into account published research on the biological effects brought on by the ability of RF signals to communicate with living tissue, and more specifically, to consider the Building Biology guidelines for human health.

Respectfully submitted by

Suzanne D Morris
