CAROLINE

Le Mas d'Azil, 9 June 2026

I, Dr Jacques Palusci, the attending physician of Ms Caroline, certify that her state [REDACTED] necessitates retirement on grounds of disability (total unfitness to perform her duties).

She suffers from intolerance to electromagnetic waves, manifested by persistent, treatment-resistant headaches, tinnitus and diminished vision.

If exposure continues, she develops neurological symptoms, including disorientation, short-term memory loss and balance disorders.

She also has high blood pressure with extrasystoles.

After one to two days, severe fatigue occurs, with low blood pressure, insomnia, and joint and muscle pain.

All these symptoms require complete withdrawal and isolation, making it impossible for her to resume her duties.

Certificate issued at the patient's request and handed to her in person.
