My life my sleep is interrupted numerous times each night since smart meters were installed at large all over NY . I live in a bldg with 60 smart meters. I personally opted out and my actual usage is obtainable; but I am continually bothered by EMF that is very intrusive. I am a Pharmacist studying for Lifestyle Medicine Board Certification exam because I no longer am able to take Perdiem jobs because I get woken up too many times each night.

My suggestion is to ask the candidate for NYS comptroller Joseph Hernandez to present valuable information to consider

Compare medication usage, prescription written and filled for blood pressure med
