

**Subject: COMMENTS IN RESPONSE TO FCC AND HHS REQUEST FOR PUBLIC INPUT ON
RADIOFREQUENCY RADIATION EXPOSURE LIMITS**

I am a practicing scientist, a civil and environmental engineer with decades of regulatory experience. The FCC is reportedly interested in hearing from the public on science concerning the effects of electromagnetic radiation on human health and the environment. I don't believe that perfunctory invitation is genuine. I don't believe in FCC as a science organization or anything like that. Clearly, it has no public health authority and no expertise with the natural environment now that both have been altered irreversibly without due consideration of potential adverse effects of vastly increased human-caused electromagnetic radiation on people, plants and animals, almost no consideration whatsoever. The current electromagnetic radiofrequency radiation exposure guidelines are not protective of human health or the environment. I know because an FCC-licensed wireless home-router without sufficient health warnings, the murder weapon, gave my wife lung cancer that grew into her heart from years of too-close exposure. "Anecdotal," you say. I say, "Fuck you, too."

FCC is a machine of the military-corporate-industrial complex, with USEPA standing down and HHS standing by silently, doing things to me with invisible technology I neither asked for nor consented to, and that goes for nearly everyone and everything living. FCC has postponed its purported science review for three decades, as long as it could after five years in defiance of a court order. This proceeding will be more of the same foot-dragging inaction while technology races ahead unfettered with all of us invisibly *chipped at present and able to be surveilled and controlled remotely by radiowave*. The Internet of Bodies, let alone Things, is growing behind the scenes.

While exact outcomes in this proceeding are hard to predict, for the public record I expect it will be something like this endless loop: The FCC will sit on the information provided for the public record following the close of filing and "deliberate," probably for a number of years, on whether or how to revise the archaic limitations. After that, FCC will propose some minor changes, if any, and assert the existing limits are adequate for all purposes and the litigation can begin anew. Rinse and repeat until it no longer matters because unstoppable (under semi-secret military orders) with the invasive, injurious technology further imposed on all, as it has already been.

Other people can submit science reports and be ignored. I can say with some confidence there is plenty of science the FCC scientists and the IEEE members and the public at large have been kept ignorant of. For just one example, a large one, I point to the failure of the mainstream science community, academia included, to recognize the existence of the electromagnetic photon-charge field as expounded scientifically by Miles W. Mathis.

(<https://mileswmathis.com/>) You would have to read his textbook on that to play catch-up. I suspect Nicola Tesla knew of the charge field to make his “death rays” and other electromagnetic technologies the U.S. government stole at his death.

Since the Mathis science website is rife with robust critiques of the deplorable state of modern science, physics in particular, I can point to that and have no further need for FCC’s so-called “science” review. Science is little more than a religion and a tool to push others around with to serve ulterior motives and gain public funding. Needless to say, the FCC can’t properly consider, and has not considered, the significant effects of electromagnetic radiation on living electromagnetic biofields. That is because FCC does not recognize the existence of the electromagnetic charge field of photons, a dominant field upon which all life depends. FCC purports electromagnetic effects on biology are limited to thermal effects. That is clearly junk science. The steam engine was built and employed long before the principles of thermodynamics were identified and verified. It is much the same with wireless technologies that don’t incorporate photonic charge charge-field considerations.

You are the type of people Mr. Mathis writes about, anti-scientific policy makers in the extreme, promoting junk-science to the detriment of humanity for power and/or personal enrichment. But you people at FCC are far worse than money-grubbing educated egg-heads. You are like Big Tobacco used to be in the U.S., and still is world-wide, but you are far, far worse. Whereas tobacco smoke was for many decades a consumer product known to have certain adverse effects on the user (despite hidden and abused “science”) that product could be refused. A Harvard study in recent years (using science) showed nicotine is not addictive, while substances added to tobacco are. Second-hand smoke has lesser effects in space and time on others and is now largely a nuisance that can be avoided because the smoke is both visible and detectable by olfactory senses.

That is not so with invisible, odorless electromagnetic radiation the FCC has determined is acceptable to blast into every far space on the planet under the deficient regulations, considering only blunt thermal-heating measures. It’s all lied about as safe to expose little babies and children to, the sick, the elderly, the electro-sensitive and everyone and everything else. FCC has taken the power to maim and kill in its hands against all life with no recourse other than appeal to corrupt and self-serving agents in service of a rapacious and uninsurable wireless “telephone” and broadband industry fronting a globalist military backbone in a war against humanity FCC, HHS, DHS and others are secretly prosecuting.

The wireless telephone industry is among the world’s most profitable because it, like Big Tobacco, has managed to mass-market an addictive product to increase “screen time” and thus exposure to electromagnetic fields on an unprecedented scale. Many users, especially the

young, now exceed ten hours per day handling a cell phone or other radiation-emitting device—and sleeping with it as well. The archaic standards certainly don't account for that, with its ridiculous "jug-head" military model for minute exposures, the anti-scientific approach exemplified. It's laughable! The FCC scientists transparently pretend to be idiots to serve other agendas.

This increase in use and exposure would hardly have been possible without FCC promotion of the industry standards as protective under HHS silence when they are not protective. I presume it was contemplated at the highest levels; calling FCC an industry partner is the understatement of the century. It is not a secret that the cell towers are outfitted with excess power capabilities used to emit high doses of radiation while the people sleep and other times in coordinated arrays and that the four-panel arrays are designed to kill. Probably only the FCC line staff is kept in the dark about the true nature of their work as foot soldiers.

I can't pretend FCC cares as it shreds the U.S. Constitution and targets the general population. It is part of plans by global technologists to manage and control populations, very, very deep pockets. Digital IDs, cell towers on every corner, transhumanist goals to make everyone a monitored cyborg with SMART dust and nanocomputers in every organ and human body. So many veiled agendas are served by invisible microwaves! The CIA premiered the "heart attack gun" to the U.S. Congress in the 1970s, the implication being such technology is far, far advanced beyond that.

Every commercial cell-phone use comes with a small to moderate dose of poison and exposures are cumulative, as is cellular damage. So while cell-phone users may have a choice about exposures, if they aren't inadequately informed on purpose, those they expose to their second-hand electromagnetic radiation smog to do not have a choice. Nor do those the FCC exposes to its tower radiations. The invisible, invasive and harmful assault on all has been spread into every public place, workplace, schools, cars, government building, the wilderness, the oceans and waters of the U.S. and within the spaces of our own homes. The only choice available, reducing exposures, has become increasingly difficult due to the ubiquitous presence of unseen electromagnetic energies from multiple sources.

The logical inference with USEPA ordered mute and HHS standing by idly is that causing disease and suffering is a desired outcome to boost medical profits for the medical "partners" at HHS. That must be why HHS can't undertake to address the health effects of radiofrequency radiation. I note the following observations, as I've long known with glyphosate, a cancer-causing synthetic herbicide marketed under the trade name Roundup™: The authorities know electromagnetic radiation in the radiofrequency ranges opens the blood-brain barrier to toxins such as glyphosate which can cause brain diseases. <https://mdsafetech.org/blood-brain->

[barrier/](#) The regulations don't consider those and other science findings such as that all people carry a body-burden of glyphosate (and other toxins) from broad and expanding usage over decades and widespread contamination of food, water and air and increased exposures to both glyphosate and electromagnetic radiation. The rise of these disparate poisons increased together. We have the USEPA culpable for Roundup™ and the FCC culpable for the RFR. Those in control of the poisons seem to want all sick and sucking the medical tit until death. Follow the money. "Buy my disease. Buy my cure," so-called petrochemical medicines. Cancer is not a disease to cure (including with beneficial electromagnetic energies, e.g., the Rife device), cancer is a business to exploit as expressed by a former Surgeon General of Canada decades ago.

Your proceedings at FCC do not offer a realistic choice to avoid exposures and I've wasted enough time commenting based on my predictions above. I am not taken in by FCC, have zero confidence in it. Nonetheless, FCC should require installation of a recordable meter to determine power emissions and cumulative exposures from every cellular phone and wireless router in a user's environment, and an audio-visual alarm for emissions above limits. The metering information thus obtained should be broadly accessible to the consumer in real-time and the public at large, and for court proceedings by the injured.

My thoughts to FCC are further expressed in a lyric-rhyme I wrote based conceptually on a most-popular episode of the "Twilight Zone" TV series of the 1960s titled, "To Serve Man," and another poem I wrote called "Ban Wireless In the Classroom." Please consider those attached writings as comments as fully applicable to your agency subterfuges.

I only wanted to express a few things for the public record and will close by writing this, my strongest recommendation: If the people at FCC and HHS think the radiation standards are protective and the warnings are adequate, then please put a router on every FCC, HHS and USEPA desk, antenna aimed at the heart, two to three feet away from the person who sits there day after day, week after week, and year after year. Also, mount a SMART meter on the wall behind each of their beds and don't forget to include the FCC Chairperson, the Commissioners, and the Directors at HHS and USEPA.

Attachment: To Serve Man, a lyric-poem by Alan Miller, PE

Ban Wireless in the Classroom, a poem by Alan Miller, PE

TO SERVE MAN

(cue intro music like Twilight Zone)

THE SUPER-TECHNOLOGISTS CAME TO OUR AID
GIVING US PRESENTS AND GIFTS THAT THEY MADE
THEY TAMED ELECTRICITY, GAVE US NEW TOOLS
NOT TO ADOPT THEM, WE'D HAVE TO BE FOOLS

THEY GAVE US A BOOK WE DID NOT UNDERSTAND
ON WIRELESS AND 5G TITLED, "**TO SERVE MAN**"
TOWERS AND CELL PHONES, SATELLITES IN SPACE
BLASTING THEIR WAVES INTO EVERY FAR PLACE

THEY SAID IT WAS SAFE; IT SURE SEEMED A GOOD THING
FOR DEFENSE FROM THE BOMB, THE WHOLE WORLD TO RING
WITH RADIO, RADAR AND MICROWAVE STATIONS
CONNECTING ALL PEOPLE IN ALL OF THE NATIONS

COMPUTERS AND ROUTERS CAME NEXT, FOR THE HOME
TVS AND WI-FI AND THEN THE "SMART" PHONE (GROAN)
MICROWAVES AT WORK AND AT SCHOOL AND IN CARS
NO WAY TO ESCAPE GETTING HIT WITH FIVE BARS

TO SERVE MAN

BUT THOSE IN THE KNOW HAVE A LONG HISTORY
KNOWING DANGERS INVOLVED WITH ELECTRICITY
THEY KNOW THEY CAN USE IT TO POISON MANKIND
TO STEAL BODIES AND *MINDS* WHILE ROBBING US *BLIND*

REFRAIN 1: THEY GAVE US ALL A PARTIAL BOOK

THEY TITLED, "**TO SERVE MAN**"
THE TRILLIONAIRES BEHIND THE SCENES
DID NOT DISCLOSE THE REAL PLAN
TO RULE WITH **SECRET MILITARY**
APPS IN **RESIDENTIAL TECH**
THE ONE PERCENT OF ONE PERCENT
ARE LEADING US INTO A WRECK

THE FIRST THINGS TO GO WERE THE BIRDS AND THE BEES
WHO KNOWS WHAT'S BEEN LOST? MOSTLY THINGS NO ONE SEES
THEY TELL US THE SIXTH MASS-EXTINCTION IS "ON"
ECOSYSTEMS WORLD-AROUND SOON WILL BE GONE

TO SERVE MAN

THEY SAY IT'S FROM CARBON, FROM ENERGY USE
TO STOP GLOBAL WARMING WE HAVE TO REDUCE!
IT'S DOUBLE-SPEAK BROUGHT TO YOU BY THOSE CORRUPT;
WE'RE COOKING THE PLANET WITH WHAT THEY'VE COOKED UP

'CAUSE WIRELESS ENERGY'S OFF OF THE CHART
POLLUTION AND CARBON LIKE A GLOBAL FART
JUICE NEEDED TO POWER THE WORLD OF 5G
MAY NEED TO BE DOUBLED BY TWENTY-THIRTY

NOT CARBON ALONE, BUT TOXICS YOU WILL FIND
OPEN DUMPS WITH E-WASTE OF EVERY KIND
AND WASTES FROM MAKING THE NEXT, BEST, LATEST THING
AND PLASTICS FROM THROW-AWAYS THEY'RE MARKETING

THEY'RE SENDING UP ROCKETS AND SPACESHIPS GALORE
POLLUTING THE AIR AS WE'VE NEVER BEFORE AND
WITH THOUSANDS OF SATELLITES SENDING 5G
THERE'LL BE NO ESCAPING, NO PLACE THAT'S WAVE-FREE

TO SERVE MAN

REFRAIN 2: THEY GAVE US ALL A PARTIAL BOOK

THEY TITLED, "**TO SERVE MAN**"

THE TRILLIONAIRES BEHIND THE SCENES

DID NOT DISCLOSE THE REAL PLAN

TO RULE WITH **SECRET MILITARY**

APPS IN **RESIDENTIAL TECH**

THE ONE PERCENT OF ONE PERCENT

DON'T CARE HOW MANY LIVES THEY WRECK

THEY'RE ROLLING 5G OUT, WE DON'T HAVE A SAY

THEY MAKE IT SOUND WONDERFUL IN EVERY WAY

A NET-LINK AT HIGH SPEED WHEREVER YOU ARE

THE WORLD OF AMUSEMENT, THE SELF-DRIVING CAR

BUT WHAT THEY DON'T TELL YOU IS THEY WANT YOUR CASH

THE TOTAL FINANCIAL CONTROL OF YOUR STASH

IT'S THE "CHINESE MODEL" THEY MEAN TO ENFORCE

SURVEILLANCE AND TRACKING, NO LEGAL RECOURSE

TO SERVE MAN

WE HAVE TO LOOK DEEP INTO THEIR HIDDEN HAND
TO SEE THE INGREDIENTS IN **"TO SERVE MAN"**
TO SEE THAT MANKIND IS JUST PART OF THE SOUP
FOR GLOBALISTS BENT ON CONTROL BY THAT GROUP

THE CODE IN THEIR COOKBOOK WOULD DO ORWELL PROUD
WITH MICRO-CELLS *WELL*-PLACED FOR CONTROLLING CROWDS
MICROWAVES COOK, THEY CAN BURN, THEY CAN KILL
IF YOU DON'T GO ALONG YOU'LL BE FORCED TO THEIR WILL

THE MEDIA WON'T TELL US; THEY'RE PART OF THE SCHEME
THEY PROGRAM US WITH THEIR MICROWAVE-TV DREAMS
THEY SELL US THEIR DRUGS AND THEIR CARS AND THEIR HYPE
FOR ELECTRONIC THINGS, EVERY POSSIBLE TYPE

AN "INTERNET OF THINGS" WHERE ALL IS CONNECTED
ONE GLOBAL SUPPLY-CHAIN, CONTROLLED, UNSUSPECTED
WITH SUBTERFUGE THEY HIDE THEIR MOST-SECRET FACT:
THAT WE'LL BE THE ONES COOKED IF WE DON'T SOON ACT

TO SERVE MAN

REFRAIN 3: THEY GAVE US ALL A PARTIAL BOOK

THEY TITLED, "**TO SERVE MAN**"

THE TRILLIONAIRES BEHIND THE SCENES

DID NOT DISCLOSE THE REAL PLAN

TO RULE WITH **SECRET MILITARY APPS** IN **RESIDENTIAL TECH**

THE ONE PERCENT OF ONE PERCENT WANT TO HAVE US BY THE NECK

AND LAST, BUT NOT LEAST, THE 5G IS A WEAPON

DEVELOPED FOR WAR, SOMETHING LIKE A RAY-GUN

TO CULL POPULATION THEY PLAN GENOCIDE

ONE FLIP OF A SWITCH CAN *DECIDE* WHO GETS *FRIED*

THAT IS THE BIG PICTURE, THINGS NOT BEING SAID

THOSE BEHIND THIS WANT CONTROL, US SICK OR DEAD

WE'RE GOVERNED BY TYRANTS, TIME TO TURN THE TIDE

JOIN THE AWAKENING COMING WORLD-WIDE

WE WEREN'T MEANT TO KNOW THE PLAN BEYOND THE BOOK

WE TRUSTED IN FASCISTS WITHOUT A CLOSE LOOK

IT'S NOT TOO LATE, RISE UP, RESIST, FORCE A BAN!

THE COOKBOOK SERVES TYRANTS; IT'S NOT **TO SERVE MAN!**

BAN WIRELESS IN THE CLASSROOM!

Honorable School Board Members and Administrators, Please place this in Public Record:

Let's microwave the children; isn't that a grand thing to do?

Let's microwave the teachers and administrators, too

With wi-fi towers on the campus, wireless in the class

With radiation everywhere these kids are going nowhere fast

These waves slow down their learning, they make it hard to think

They sterilize invisibly, they break genetic links

So maybe we've been told a story, sold a bill of shoulds

By profiteers who'd just as soon make a real "killing" if they could

These telecoms have power, their lobby runs the F.C.C.

The doors revolve in Washington from politics to industry

They've got big friends in Congress, the ones they buy and lease

But most of all they've got consumers, in the dark, they fleece

The giant telecoms have cash to advertise and fool

The trusting public with their poison, tech-gadgets for which some drool

The safety tests and guidelines are all out-of-date and junk

They don't protect our kids from E.M.F.s—do not believe that bunk!

They don't allow skin heating, but that's not near enough

They only address short-term use, not constant use of wi-fi stuff

Think wi-fi routers of all types, laptops and towers do no harm?

You don't know the facts; you're sleeping late, have tuned out the alarm

BAN WIRELESS IN THE CLASSROOM!

Not one insurer in the world sells telecom insurance
They know widespread harm's a time-bomb, with F.C.C. assurance
They know what we don't know, these insurers who won't lose
They see death and sickness coming: Best think hard on tech you use

I call on all the school boards, the mothers and each dad
To rise up and protect their kids from dangers worse than bad
Ban wireless in the classroom! They're targeting our young
In the radiation-nation what will we let be done?!

We choose to use their products—can choose to do without
A hard-wire is much safer, of that there's zero doubt
“Unsafe at any frequency”—the wi-fi simply has to go
So children that we love and care for live and thrive and grow

The answer is so simple, a win-win to enable
Dump the wireless and put in fiber-optic cable
It's fully safe and faster, and it's more secure
Act now to save the youngsters, prevent rather than cure

Precautions must be taken if the outcome is unsure
