Stop The Screeching

Just watched your 1:06 video titled "5G Wireless Radiation Dangers". I don't want to see an AMA doctor because I don't want to treat the symptoms with drugs when I know what it is... About a year ago the power was shut off in and around my neighborhood for 24 hours to repair a power line, best sleep I ever had, in addition to insomnia other symptoms include but are not limited to extreme fatigue, high blood pressure, problems concentrating, vision getting darker, heart palpitations, but the main symptom is the screeching in my ears I keep checking for blood. Please include my name as one affected by wireless radiation or ElectroMagnetic Hypersensitivity.
