

I. Introduction

This comment presents a selection of official and expert sources demonstrating advancements and scope of **EMF RF technology** applications, including historic accounts of human experiments in the U.S and large-scale contemporary (covert) deployment of harmful Directed Energy Weapons (DEW) / **EMF / RF weapon systems** on targeted citizens that need URGENT attention and action. Organizations such as TargetedJustice.com, PACTSntl.org, ICATOR.be, STOPeg.com (among others) have tens of thousands of members reaching out for help and relief from most cruel human experimentation and torment day in day, conducted under *Unacknowledged Special Access Programs* (USAPs) under the leadership of the United States. Nuremberg material. Every brain and central nervous system (CNS) is at risk and can be connected to wireless weapons/control systems (Havana Syndrome, AHI1, DEBE: *Directed-Energy Bio-Effects*). Is MAHA willing to live up to their responsibility to **protect citizens** from remote-controlled EMF RF weapons causing grave harm to targeted bodies and brains? Thousands of citizens' health and lives are lost.

HHS cannot shrug off responsibility or jurisdiction. Atrocities at this scale are NOT possible unless HHS is complicit (condones the projects, looks the other way, ignores/neglects reports in high numbers, remains silent). HHS, NIH, FDA's involvement in human experimentation, systematic harm on citizens is a matter of public records, as illustrated under **Q18** additional evidence (and Q6 (6)) of this comment.

Recommendations for HHS are summarized at the end of this comment. Addressing the discrimination of ordinary civilians raised in the seminal lawsuit *Ber vs CDC* along with a permanent **helpline** (like the Church Committee offered) for those harmed by WEAPONIZED military-grade EMF RF Neuro Technology is crucial to end the historic cover up of crimes against humanity with covert weapons technology. Implement the **UN Draft Recommendations** on Neuro-Technology, Paris 2025. **Declassification** of taxpayer-funded R&D of weaponized EMF RF technology and a **public dialogue** with officials refraining from being paid off to remain silent(?) are overdue. Beware of Intelligence plants in every branch of the government tasked to thwart/stonewall any efforts to acknowledge and address the EMF RF abuses / **USAP 'ULTRA'** (security clearance level 35) against targeted subjects. Our government listening to infiltration (Deep State gatekeepers) rather than to their citizens is one of the main reasons for ongoing special operations and grave harm.

II. Answers to specific questions set out in HHS's RFI

Q2: The comment offers perspectives of individual consumer(s), as member of the public and academic researcher.

Q3: Adverse health effects associated with exposure to RF/EMFs

[It is noted that this question (Q3) is framed in vague terms, with multiple softeners, same as legacy media won't stop to pin the term '*mysterious*' to any Havana Syndrome coverage, while reference presented in this comment are based on objective, verifiable facts].

a. The type(s) of wireless technology or RF/EMF source(s) involved

Directed Energy Weapons; Neuro-Technology; transmitters (both stationary and portable)

b. The nature, duration, frequency, and approximate timing of the reported exposure(s).

DEW attacks are carried out any time of day, varying in strength/intensity, sudden onsets, lasting from a few seconds to many hours nonstop. Day in day out, 365 days a year. Experiments are performed especially when the target does not move (causing severe sleep deprivation).

Q3c. The potential adverse health effects

Disruption of and interference with various body/brain functions; burns; pressure, zapping on body parts (Neurostrike weapons are much more sophisticated than tasers).

U.S. FOI document detailing **Mind Control** affecting the entire human body (Fusion Center Washington 2018). "*Remote Mind Control / Remote Brain Mapping*". *Special attention to gen*tal area: Itching, forced org*sm, intense pain etc.*

f. Whether steps to reduce or eliminate exposure were taken

Tens of thousands spent on shielding material: various metals/magnets, water, clay, rubber, Faraday cage. Blocking is successful temporarily only as military-grade EMF RF weapon systems have sensors to read out dielectric properties, combining different wave forms (including LF / VLF, longitudinal), dial in/out accordingly and overpower any shielding material after some time. Spark gaps and software programs for jamming provide very limited relief.

g. Any **supporting documentation**, including scientific reports, exposure measurements, or other relevant information.

A list of **further references** documenting EMF RF Directed Energy Weapons, Neurotechnology and wireless technology controlling the human mind are attached (Attachment C).

Zorro Ranch wasn’t just a pedophile’s estate. It sits near Los Alamos and **military tech** zones. Epstein was a key player linking child trafficking, elite blackmail, and **black projects**. Valdez-Rodriguez dug too deep and the system hit back with **directed energy weapons** that “don’t exist.” This is the new reality of control.

(3) **Dr. Nick Begich** (background in traditional and complementary medicine, politics, health science, electrophysiology; effects of electromagnetic fields on the human body) on EMF influence on the human body: Involves agencies and **every branch of the military** having projects since the 1980s that deal with non-kinetic developments: AirForce, Marine Corps, U.S. Army, DARPA, farmed out and fractionalized to the private sector, academic institutions, military establishments, flowing back to CIA, NSA, DARPA holding vested interests, deciding on applied technologies to the various branches of the military.

Dr Nick Begich (scientist, [author](#) of “*Angels don’t play this HAARP*”): *Why would the [Gov experiment on half a million people](#), nobody ever held accountable for that - if it weren’t for the purpose of rolling out these technologies to the [entire population](#)?*

“HAARP generates prodigious amounts of energy.” “One fifties of the **RF energy** the earth naturally produces is enough to influence the (brain and) behavior of human beings without any kind of implants or mechanical or electronic device attached to a human being. Just by **influencing RF energy** alone. That was in the mid-80s. Where we have gone from there are great leaps.” “Technologies that the ArForce now refers to as controlled effects, overriding all five senses: sight, sound, all of them..” “What would synthetic memory do to the justice system around the world? This is the nature of the technology. Why would you want to wipe out memories? What else would you wipe out? What else could you do with that? Who will do it? **Who will determine** what goes in your brain, **what stays in your brain**, and **is this the purview of governments?** Is this what governments should do?” “You can target individuals or you can target masses of people.” “There is a huge gap in terms of where this technology has gone and the fact that legal frameworks are not in place to protect people on domestic or international level.” “The **experimentation goes on**, the AirForce has requests for proposals out, **DARPA has contracts** – all under the umbrella of affecting the human operator. Learning about the human body and brain when it has **weapons applications** and the research is funded by the **military**.”

“Veterans Administration is often used to test new ideas, concepts. Even in the MK Ultra release of information (1960s/70s) over 4,000 men and women that they admit in the U.S. military were used as experiments subjects without fully informed consent.” “Secretary of Energy O’Leary under the Clinton administration said over a **half a million Americans have been used in human experiments over four decades**. Mind control and other experiments without heir informed consent. Half a million people they admit to and no-one has been put on trial for that? **Nobody has been held accountable** for that? Most Americans find that highly objectionable that no-one has been held accountable for **invading the very essence of who they are as human beings**. That’s the problem, it has been going on for 40 years, it **continues today under the guise of increased security** - increased security for what? If you **don’t have freedom of thought** foundationally – what are we securing and for whom?”

Billion-dollar funding every year: US spending of **\$5 Billion** over 10 years (BRAIN 2025) has ramped up to \$500M funding made available by the White House each year (**DARPA**, NIH, National Science Foundation). While DARPA research pertains to **defence** and **weapons**, media coverage (if any) is biased towards benevolent framing of dual-use technology ('understanding the brain better'; 'enhance human potential'; 'decrease the rate of brain disorders'; 'restore vision'). **Non-consensual human experimentation** has been authorised under the bi-partisan 21st Century Cures Act 2016 (www.Stop3024.com). <https://medium.com/neurotechx/the-brain-initiative-the-race-to-understand-the-human-brain-c2fddfea271e>.

NB: While neurological surveillance is justified for the purpose of monitoring people with a neurological condition, the neuro-surveillance is inflicted on perfectly healthy citizens. When those perfectly healthy citizens report the excessive tech abuses, they will be railroaded to the mental wing and assigned a DSM-V dossier (ie. medical fraud). The chronologic sequence of events (neuro tech abuse came first) is never acknowledged. Perpetuating cruel human experimentation, discrediting and defaming them for life. (6) **Unacknowledged Special Access Programs** (USAPs) are authorized under the broader framework of **Obama's** E.O. 13,526 (2009, supersedes all previous executive orders on the subject and remains in effect), which governs the U.S. **classification system** regarding national security information within the

U.S. Executive Branch and allows for special access controls beyond standard classification levels. Special access programs (SAPs) are security protocols that provide highly classified information with **access restrictions** that exceed those for regular classified information. An SAP will fall under three protection levels: Acknowledged, Unacknowledged, and Waived-Unacknowledged. 10 U.S.C. §119 mandates reporting requirements for SAPs and distinguishes the oversight rules for **unacknowledged** and **waived programs** (<https://uapnewsdesk.com/2025/05/31/what-are-special-access-sap-usap-wusap/>). A Waived-USAP has been formally **exempted from the majority of oversight and reporting requirements** by either the Secretary of Defense or the President (see Obama legislation). The only legislative branch members who are required to be informed of waived-USAPs are the so-called “Gang of Eight,” or the chairpersons and ranking committee members of the **Senate and House Appropriations and Armed Services Committees**.

• Q18 / Q4m / Q5n: RECOMMENDATIONS

(i) Address the discrimination raised in the seminal lawsuit **Ber vs CDC** (<https://clearinghouse.net/case/48312/>): Diagnoses, treatment and compensation is available to state employees and their families, but no CDC/FDC/NIH guidance is in place for ordinary citizens yet. Weapons deployment (and operators of the EMF RF weapon systems) do not discriminate between state-employees' and non-state employee brains unfortunately. The consistency gap needs to be closed. **Irreparable harm** is being caused every single day that passes by. HHS fails citizens on its core mission to protect their health and lives.

(ii) Implement a permanent, dedicated **helpline** (akin to the Church Committee in the 1970s) for those harmed by WEAPONIZED military-grade EMF / RF / Neuro technology

(iv) Help to implement the 2025 **UN Draft Recommendations on Neurotechnology** protecting citizens against state- and non-state perpetrators:

UNESCO Draft Recommendation on the Ethics of **Neurotechnology**, Paris 2025.

56. Governments and societies should work together to ensure those **harmed by neurotechnology** have **access to justice** and **effective remedy**, and those engaged in wrongdoing are held accountable.

108. ...due consideration should be given to the **dual-use potential of neurotechnology** research to avoid its use for **malign purposes**.

154. Member States should establish or designate national organizations responsible for **overseeing and coordinating the regulation**, vigilance, and **oversight of neurotechnology across relevant government agencies**. These coordinating bodies should be tasked with ensuring that **legal** and **regulatory frameworks** are **consistently applied**, that public health and safety are protected, and that **ethical standards and human rights are upheld** throughout the whole lifecycle of neurotechnology. This includes facilitating **inter-agency** collaboration, monitoring compliance with national and international standards, and ensuring that data and insights from different regulatory domains are shared effectively to inform decision-making and policy development.

155. Member States should strive to extend and complement their own actions in respect of this Recommendation, by cooperating with **all relevant national and international governmental** and **non-governmental organizations**, as well as **transnational corporations** and **scientific organizations**, whose activities fall within the scope and objectives of this Recommendation.

158. The monitoring and assessment of the impact of neurotechnology and related ethics policies and practices should be carried out continuously in a systematic way proportionate to the relevant risks. This should be based on internationally agreed frameworks and involve evaluations of private and **public institutions**. Data collection and processing should be conducted in accordance with international law, national legislation on data protection and data privacy, and the values and principles outlined in this Recommendation. <https://unesdoc.unesco.org/ark:/48223/pf0000393395>

- Vice President Joe Biden challenges the tracking of humans with **microchips** as new SC John Roberts Chief Justice is sworn in, 2008: <https://www.youtube.com/watch?v=41tTMlpqMPo> (Biden: Congress soon will have to rule on the constitutionality of having people implanted with microchips that **track their every movement**, or whether **brain scans** can be used to determine if a person is inclined for criminality or violent behavior). NB: Agency and private sector are colluding in absence of consent by implanted persons; redress stonewalled at every turn. <https://ignoranceisfutile.wordpress.com/2008/09/09/obamas-vp-joe-biden-promised-mandatory-microchip-implant-supreme-court-ruling/>

- RFK Jr.'s CHD organization (Children's Health Defense) has first-hand material and contact with the targeting-support organizations, such as ICATOR president Melanie Vritschan: Presentation for **Children's Health Defense**, <https://www.youtube.com/watch?v=SJOFWAhccsM>

- Senator Edward Kennedy (uncle of Secretary Robert F. Kennedy Jr.) helped to end the Tuskegee experiments in the US before. Will HHS Secretary Robert F. Kennedy Jr. hold up the legacy?

Beware of Intelligence plants (staff loyal to the 'deep state') in every branch of the government tasked to cover up, thwart, stonewall, infiltrate and undermine any efforts to acknowledge and address the highly illegal EMF RF operations (USAP 'ULTRA', security clearance level 35) against targeted subjects.

III. Conclusion

This comment reports irrefutable evidence of weaponized EMF RF technology and corresponding applications. Given the gravity of humanitarian emergency including gross physical harm inflicted on thousands of citizens day in day out, we call for urgent action.

Reference is made to the research and reporting to this HHS call by **Len Ber, MD**, author of numerous research papers on Havana Syndrome, civilian diagnoses, most rigorous up-to-date literature/press reviews available on the topic. Ber has submitted a thirty-page PDF comment, addressing each question in the HHS RFI (Request for Information), fully substantiated, with **71 references**.

Main points:

1. Recognize Havana Syndrome AHI1 phenotype as a novel clinical phenotype.
2. Current safety standards are not adequate for the exposure parameters attributed to this condition.

The comment further recommends a permanent **HELPLINE** (like the Church Committee offered) for those harmed by WEAPONIZED military-grade EMF RF Neuro Technology and to implement the **UN Draft Recommendations** on Neuro-Technology, Paris 2025. Reversing irresponsible legislation by the Obama administration is as important as **declassifying** taxpayer-funded R&D / project documents of weaponized EMF RF technology and HHS' initiation of a genuine **public dialogue** acknowledging grave harm on civilians.

A. **Thermal imaging** visualizing that subjects targeted and linked to the wireless EMF RF weapon systems have their nerve paths fired up with non-organic electricity 24/7 without consent. Many more distinct characteristics to prove the weapons / remote neuro monitoring abuses, see Expert Report (Attachment B). The corresponding Thermography method has been shared with and accepted by the U.S. Department of Energy (2024) to establish evidence on these cases.

B. **Expert Report** to the UN Rapporteur for Torture outlining the targeting program with wireless EMF RF Neuro weapons technology.

C. **Reference list** further documenting Directed Energy / EMF RF Weapons, Neurotechnology, BCI, including official and scientific sources. There is a much larger civilian library which is beyond the scope of this comment.
