Joel Smitter

Purpose:

The purpose of this letter is to collaborate with a collective summary of information that was collected during 3 audio consultations with Joel Smitter. The information collected during the audio consultation is outlined and categorized properly below, in the List of Information. The summary is a basic interpretation of information that is collected from all 4 recordings collectively.

Summary

Reviewing all the information within the 4 recordings, Joel Smitter is a victim of medical experimentation with the use of Directed Energy Weapons (DEWs). The group of people that are involved with Joel Smitter attacks are civilian personnel both in Europe and the United States, with connections to the US Army, and military weapon systems, equipment, and software. The United States military personnel also have direct connections to child human sex trafficking operations along with murder rooms, cybersecurity tools, and medical equipment, connecting to other states and locations. Some of the main locations where the civilian and military group connect to are Chicago IL, South America, North Carolina, California, Hawaii, Florida (Tampa), Atlanta Georgia, and Australia. The civilian military contractors and employees do have their amateur radio licenses and private radio stations that they personally use to gain access into satellites systems.

Some of the GPS, tracking, and surveillance systems that are being used were discovered on HWY 60 in Chicago IL, on the eastern side of the highway. The group has different kits for different equipment and weapons systems that help with programs, sequences, algebra, operations, and system controls. One of the kits was a highway kit, that is used on electronics, towers, cameras, signs, along the highway that proves that all systems are interconnected while traveling on a highway for tracking and surveillance purposes. Some other various types of kits identified are a zero kit for grounding weapons with use of the electrical grid, program sequencing kit for programming languages and scripts, drunken kit for alcohol use and manipulation within the body and headphone kit for radio and software connections.

Some aerial units that were discovered and involved with the use of DEWs, were the Eagle (military jet), Hunter (drone), and an airplane owned by HAARP. The US and European civilian military group operations also have connections to police officers, hospitals with connections to HIPPA messaging systems, aerial support (MEDVAC), ambulance services, hospital teams, and air support teams and services. The military has other weapons that were not being used on Joel Smitter and was located on a boat in Tampa Florida (bay area) which was an air machine, lightning bolt, air lock, and HALO with Luana programming in Hawaii.

Some of the major DEWs that were being used on Joel were low tech equipment (low energy/eco/green/SMART), mind control technology, Aero Laser weapon with a vacuum pump, neural interface/integration, and Lucid signals. Lucid signals are Binaural beats and works well with acoustics along with Green LASER technology. Additionally purple/violet, Blue & Yellow lasers were being used as well for the acoustic and neural attacks on Joel Smitter. Blue & Yellow are short range lasers that work with medical equipment, software and programs. Blue & Yellow also connects to information that matches the line breaker, system codes, used to connect into the breaker (fuse box) inside a home accessing the electrical grid. The US and European civilian military group also had connections to jammers which is mainly being used to jam evidence.

The civilian military employees and government contractors have contracts with specific companies, Arc-linking systems for communications, Murkle tech, Aero, Pfizer, NICORP, Rocket, Chestnut Security, Aro emergency, HIPPA, alligator tech, and Thumper which is a porn site. Thumper is a porn site that also does live streaming sex videos and allows access to streamers while connecting to Joel Smitter optical nerves with use of CAD software. Additionally, the civilian military operators also had granted access into personal passport information, applications, and review, cybersecurity services, HIPPA management system, operations, messaging, and governmental background checks.

Joel Smitter is also a victim of the pharmaceutical companies with HIPPA and Pfizer being involved. Directed energy weapons are being used with medical equipment that connected and attacked Joel Smitter body. Some of the locations that the LASER weapon systems connected to the Brain, toes, ear, tongue, hip bones, belly, knee, left elbow, feet, bones, leg, nipple, and heart. One system was called a shrinking computer which is used to view cells and their structures. Pfizer is looking for specific samples of bile within the stomach or belly which was being attacked. The civilian military group can manipulate chemicals in the human body to

make internal bombs which one example the users wanted was a napalm bomb. By using hydrogen bonding techniques with weapon systems, the chemical samples from the bile creating a gas inside the human body like Napalm is possible, including glucose, heat (laser), and oxygen (red blood cells). Samples can be taken from laser technology on chemicals, epidermis, organs, tissues, bones (cartilage, marrow), muscles, blood, all within the human body.

There were some main programs and reasons why Joel Smitter is being attacked by DEWs and used for medical experimentation. Using FAYDA (Demographic/Biometric Identification-National ID Program), presidential agreement forms (Obama, Clinton, & Biden), with use of Neural face radio. Pfizer is doing human experimentation on vaccines with the Tetanus shot (Tdap vaccine), and vaccine studies (samples/data). Joel Smitter is a victim of DEWs, and medical experimentation, down below is the categorized information collected during the audio consultation.
