

Stop Non-Consensual Human Testing

Repeal Section 3024 of the Cures Act

Current Law : Section 3024 of the 21st Century Cures Act (Public Law 114-255, enacted December 13, 2016) amends Section 520(g) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360j(g)). **It authorizes the waiver of informed consent requirements for certain clinical investigations** involving investigational medical devices or drugs under specific conditions. This provision aims to facilitate research by reducing regulatory burdens for low-risk studies while maintaining protections for participants.

Millions at Risk—Without Their Knowledge

We are at a crossroads where the U.S. government has quietly legalized non-consensual human experimentation. Section 3024 of the 21st Century Cures Act—expanded in 2024 to protect corporate actors—**allows private and public entities to test on U.S. citizens without their knowledge, consent, or any meaningful ethical oversight**. In addition, current laws are inferior when keeping up with technology.

We must act before irreversible harm becomes normalized. This petition is a global call to restore the sanctity of informed consent and stop the unchecked abuse of 'minimal risk' loopholes. We should demand an immediate investigation into the legal, ethical, and constitutional violations resulting from the implementation of Section 3024 of the 21st Century Cures Act. We should further object to the 2024 expansion that extends national security-based data protections to private corporations, effectively shielding experimental programs from all public oversight and legal challenge. This provision is a clear and present danger to informed consent, human rights, and public safety.

We need medical choices, full disclosure and freedom! Currently, with conventional doctors, the standard of care to treat cancer is with three primary methods: surgery, radiation, and chemotherapy. There are many proven NATURAL ways to cure and heal. A high percentage of patients are not provided full disclosure, offered natural treatment options, or engaged in discussions with their doctor about their diet, lifestyle, or environmental factors in their home or workplace.

We Demand:

- | | |
|---|--|
|  Immediate Congressional Hearings |  Engagement with U.N. Human Rights Bodies |
|  Full Repeal or Major Amendment of Section 3024 |  Mandated Full Disclosure and Informed Consent |
|  Creation of a Transparent Public Registry |  Formation of an Independent Ethical Oversight Body |
|  Mandatory IRB Review |  Legal Protections for Whistleblowers |

Please sign the petition and SHARE it with your neighbors and local representatives to create a healthier, safer community together!

Your voice can help shape a brighter future for us all!
